BLACK ROSE

**PLAYFIELD SHOT MAPS
&
RULES**

RULES

MULTIBALL & BONUS MULTIPLIER

Complete "L-O-C-K" rollover lanes to activate PIRATES' COVE "LOCK1" lamp. Additional completions of "L-O-C-K" awards bonus multiplier.

LOADING CANNON

Open Davy Jones' Locker by scoring opening shooter skill shot, by completing lower, middle, and upper 3-bank targets, or by making consecutive shots up ramp from side flipper.

SINKING A SHIP

Shoot flashing jewels or treasures from the cannon to collect displayed awards and add letters in the "S-I-N-K-S-H-I-P" sequence. Also, add letters by shooting the flashing ramps during multiball play. Completion of "SINKSHIP" enables Broadside Cannon Shot to sink the ship.

SPECIAL

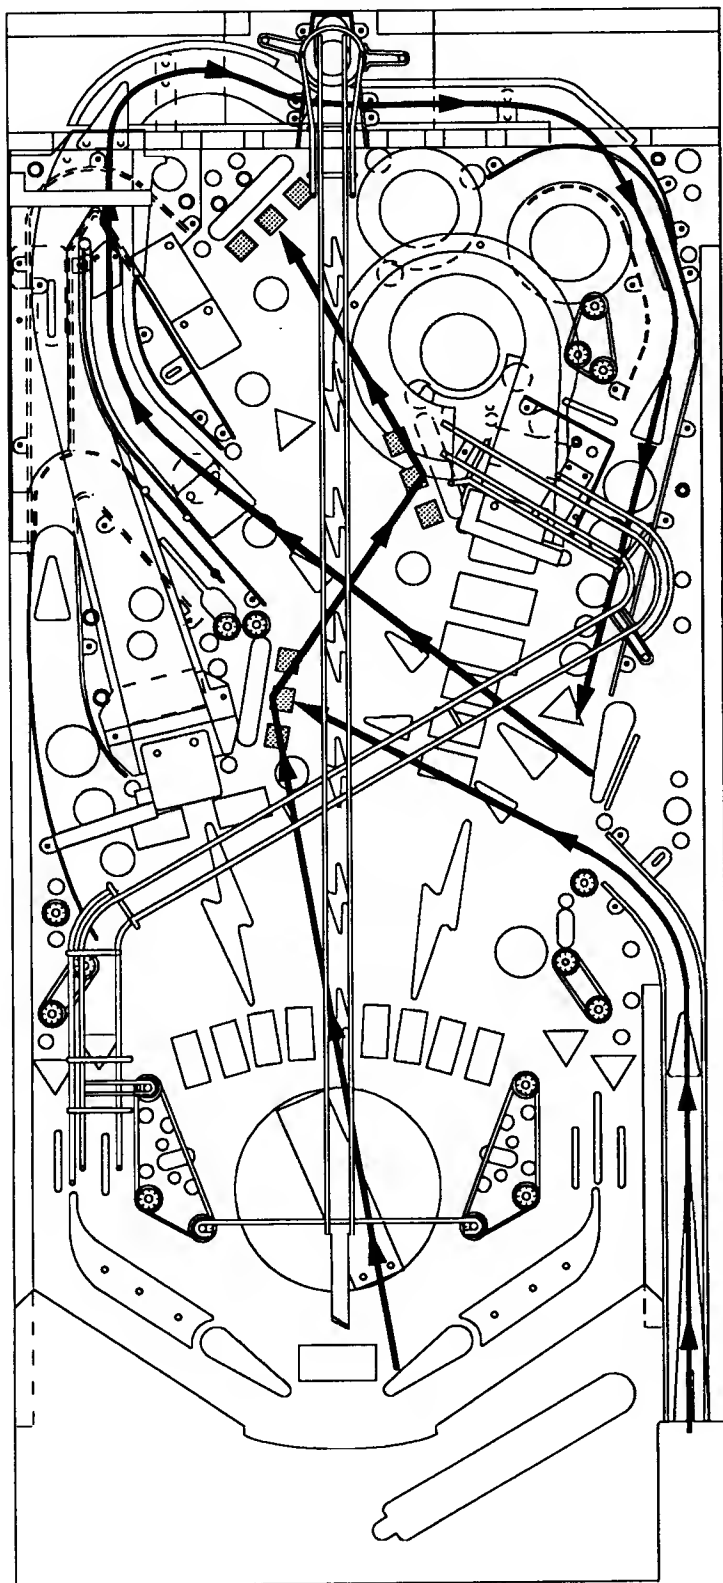

Sinking multiple ships from the cannon lights "SPECIAL".

EXTRA BALL

Complete Whirlpool ramp sequence before it times out to collect "EXTRA BALL".

JACKPOT

Light "JACKPOT" by completing all BROADSIDE center mast values.

"DAVY JONES' LOCKER"

To open Davy Jones' Locker:

- 1) Skill Shot - Hit flashing lower 3-bank targets from shooter at beginning of ball play.
- 2) Complete lower, middle and upper 3-bank targets during ball play. See: "Doubloon Target Shot"
- 3) Make consecutive shots up locker ramp from side flipper.
- 4) 3-Bank Rebound - Scoring any target on all three 3-banks in rapid succession immediately opens "Davy Jones' Locker."

Multiball:

Score Jewel when Flashing.

When Locker is open, see: "Load Cannon Shot".

"LOADING CANNON"
(LOCKER OPEN)

To Load Cannon:

- 1) Shoot from side flipper.
- 2) Shoot from shooter at beginning of ball play.

When Locker is closed, see: "Davy Jones' Locker".

"SIDE FLIPPER/LEFT "FLIPPER COMBINATION"

3-Way Combination:

- 1) Start 3-way combination by shooting left ramp with lower right flipper or by exiting the jet bumper area and using the upper right flipper.
- 2) Complete shots #1 and #2 in sequence for Big Score.

2-Way Combination:

- 1) Start 2-way combination by shooting shot #1 from the upper right flipper.
- 2) Complete shot #2 for Big Score.

Multiball:

Score Jewel when Flashing.

"PIRATES' COVE"

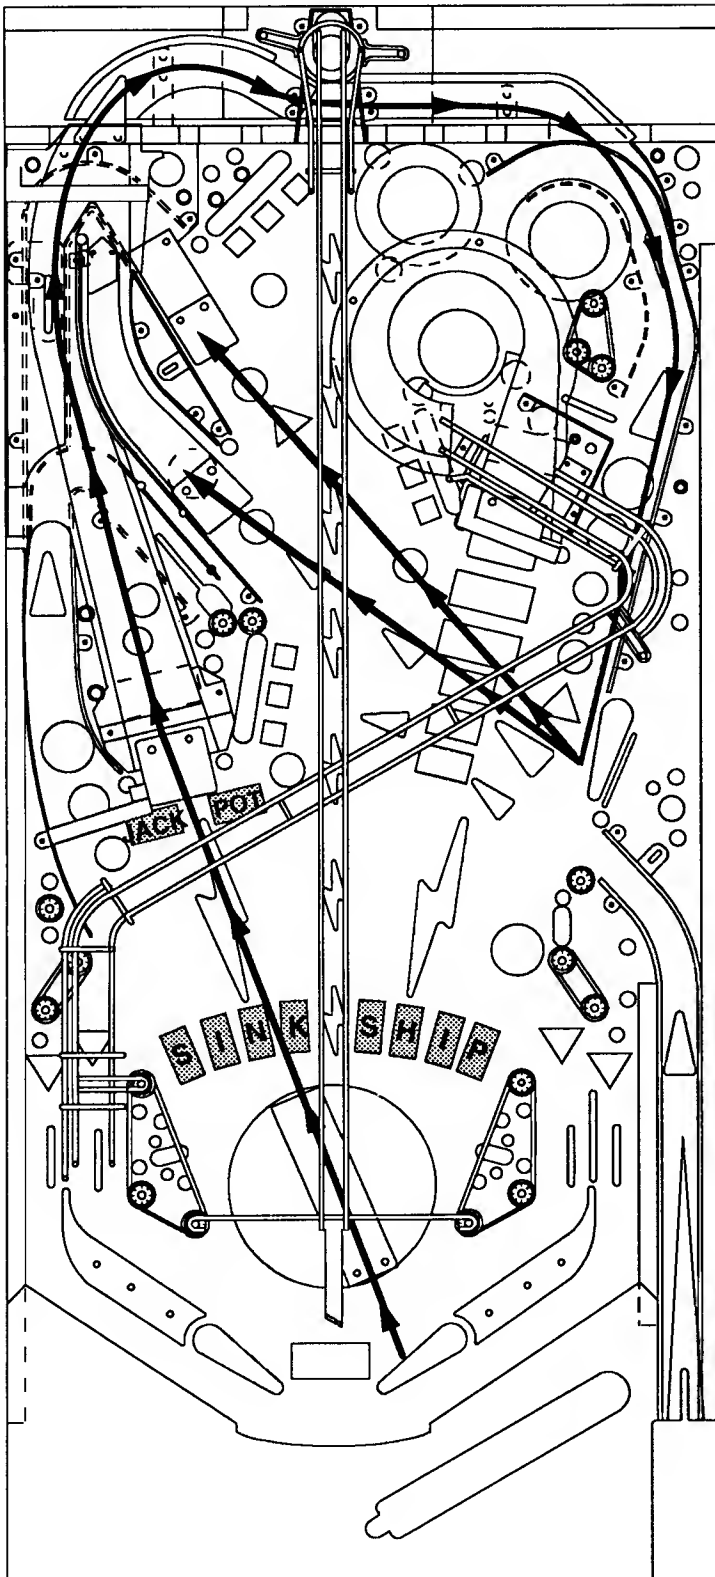

Shoot "Pirates' Cove" when flashing to lock ball for Multiball:

- 1) Complete "L-O-C-K" rollover lane lamps at bottom of playfield, or spot letters by shooting into "Pirates' Cove", to start "LOCK 1" lamp flashing. Additional completions of "L-O-C-K" awards bonus multiplier.
- 2) Shoot into "Pirates' Cove" when "LOCK 1" lamp is flashing to release a second ball to the shooter for 2-Ball Multiball play.
- 3) 3-Ball Multiball is achieved after locking both balls into "Pirates' Cove" during 2-Ball Multiball. A third ball will now be released to the shooter.
- 4) Score "Special" when lit.

Multiball:

Score Jewel when Flashing.

"LEFT RAMP"

Shoot left ramp to:

- 1) Score "Jackpot" when jackpot lamps are flashing.
- 2) Double score of Locker (middle) Ramp.
- 3) Start 3-Way Combination shot, (see Side Flipper/Left Flipper Combination, shot map D).

Multiball:

- 1) Add letter in "S-I-N-K S-H-I-P" sequence when ramp is flashing.
- 2) Score Ramp Treasure when flashing.

"BROADSIDE" POPPER

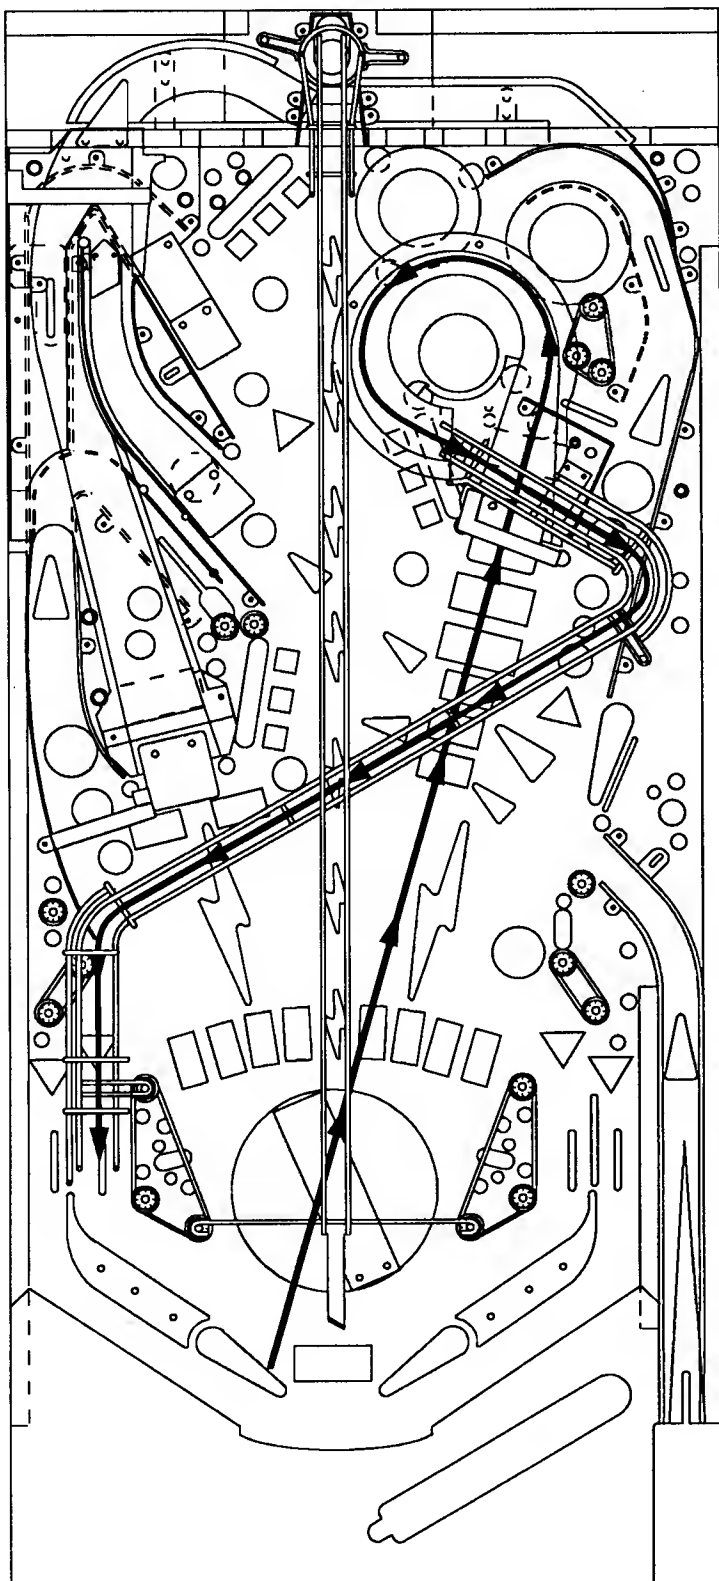

Shooting "Broadside" Popper:

- 1) Scores lit value of sequencing Broadside Bonus.
- 2) Completion of center mast (Broadside Bonus) lamps, lights "Jackpot" at left ramp.
- 3) During 1-Ball play if center mast is not lit, popper shot will start instant re-light. Shoot ball back into popper before time runs out to re-light Broadside Bonus.

Multiball:

Score Jewel when Flashing.

"WHIRLPOOL RAMP"

Shoot "Whirlpool Ramp" to:

- 1) Advance scoring level.
- 2) Award Extra Ball or Million at top value.

Multiball:

- 1) Add letter in "S-I-N-K S-H-I-P" sequence when ramp is flashing.
- 2) Score ramp treasure when flashing.

"RIGHT ROLLOVER TO JETS"

Shoot rollover to:

- 1) Advance scoring value of Jet Bumpers.
- 2) Score "Special" when lit.

Multiball:

Score Jewel when Flashing.

"DOUBLOON TARGET"

- 1) Hit "Doubloon" stand-up target when lit to spot a 3-bank target.
- 2) Hit target when flashing to restart "Broadside Bonus" values sequencing.

SHOOTING "CANNON"

- 1) Press "Fire" button when flashing and cannon is aimed at desired target.
- 2) Shoot flashing Jewel & Treasure targets from cannon to collect displayed feature and award letter in "S-I-N-K S-H-I-P".
- 3) Completion of "S-I-N-K S-H-I-P" letters lights center "Broadside" shot to sink the ship and collect ship value.

FIRE

"HIDDEN TREASURE"

1) Collect all Jewels & Treasure Chests during Multiball to start Hidden Treasure Bonus.

All Jewels & Treasure Chests hit thereafter are worth big points each until the end of Multiball play.

This image shows a full page of white paper with horizontal dotted lines, typical of primary school writing paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Game Operation & Test Information

BLACK ROSE (System WPC) ROM Summary

IC	TYPE	LOCATION	BOARD	PART NUMBER
Game ROM 1	27020	U6	CPU	A-5343-20013-1
Music/Speech ROM 2	27010	U15	Audio	A-5343-20013-2
Music/Speech ROM 3	27010	U18	Audio	A-5343-20013-3
Music/Speech ROM 4	27010	U14	Audio	A-5343-20013-4

NOTICE

Order replacement ROMs from your authorized **MIDWAY MANUFACTURING CO.** distributor. Specify: (1) part number (if available); (2) ROM level (number) on the label; (3) game the ROM is used in.

PINBALL GAME ASSEMBLY INSTRUCTIONS

BLACK ROSE IS A 3 BALL GAME.

<u>Power:</u>	Domestic 120V @ 60 Hz	<u>Dimensions:</u>	Width: 26" Approx. Depth: 55" Approx. Height: 77" Approx.
<u>Temp:</u>	32° F to 100° F (0° C to 38° C)	<u>Weight:</u>	Approx. 297 lbs. (crated)
<u>Humidity:</u>	Not to exceed 95% relative.		

1. Remove all cartons, parts, and miscellaneous items from the shipping container and set them aside.
2. Place the cabinet on a support and attach rear legs using leg bolts. Leg levelers and leg bolts are provided among the parts in the cash box.
3. Attach the front legs (after installing leg levelers), using leg bolts. See diagram below..

Pinball Assembly, Playfield Pitch Angle, and Leg Leveler Details.

4. Reach into the cabinet and backbox and ensure that the interconnecting cables are not kinked or pinched. Be careful to avoid damaging wires at any stage of the assembly process.
5. Raise the hinged backbox upright and latch it into position. Unlock the backbox, and remove the backglass, storing it carefully to avoid scratches. Remove the shipping block holding the Insert Board. Unlatch and open the Insert Board. This allows access to the bolt holes used for securing the backbox upright. Install the washer-head mounting bolts through the bottom holes of the backbox into the threaded fasteners in the cabinet to secure the backbox. Close the Insert Board and latch it in position. Reinstall the backglass, and lock the backbox.

⚠ CAUTION

FAILURE TO INSTALL the backbox mounting hardware properly can cause personal injury.

NEVER TRANSPORT a pinball game with the hinged backbox erect. Always lower the backbox forward onto the playfield cabinet on a layer of protective material to prevent marring or damage and possible personal injury.

6. Extend each leg leveler slightly below the leg bottom, so that all four foot pads protrude approximately the same distance. Remove the cabinet from its support and place it on the floor.
7. Unlock and open the coin door. Move the molding latch lever toward the left side of the game, to release the front molding. Lift the front molding off the playfield cover glass, return the latch lever to the right, and close the coin door. Carefully slide the glass downward, until it clears the grooves of the left and right side moldings. Lift the glass up and away from the game, storing it carefully to avoid breakage.

8. Place a level or an inclinometer on the playfield surface. Adjust the leg levelers for proper playfield level (side-to-side). NOTE: It is recommended that these measurements be made ON the playfield, not the cabinet nor the playfield cover glass. Tighten the nut on each leg leveler shaft to maintain this setting.
9. The TRU-PITCH™ level is located on the right shooter rail. This allows the playfield pitch angle to be accurately adjusted WITHOUT REMOVING THE GLASS. The first line (closest to the front of game) on the level is approximately 6 degrees. Every line thereafter is approximately another 1/2 degree of pitch. The recommended pitch for Black Rose is between 6 and 6 1/2 degrees. The NOSE of the bubble is between the first and second line on the level (see diagram below).

TRU-PITCH™ level between 6 and 6 1/2 degrees.

CAUTION

Playfield pitch angle adjustments can affect the operation of the plumb bob tilt, inside the cabinet. The plumb bob weight is among the parts in the cash box; the operator should install the weight and adjust this tilt mechanism for proper operation, after completion of the desired playfield pitch angle setting.

10. Move the game into the desired location; recheck the level and pitch angle of the playfield.
11. Verify that the **required number** of balls are installed in the game. **BLACK ROSE** uses 3 balls.
12. Install playfield mylars if desired.

NOTE: The **Black Rose** playfield is specially coated with a Diamond Plate™ surface and does not require a protective mylar. However, playfield mylars can be purchased through your local Bally Distributor. Specify part number 03-7960-20013-1 for full playfield mylar.

13. Clean and reinstall the playfield cover glass, reversing the procedure of step 7.
14. To attach line cord, remove envelope stapled to the inside cabinet (near cashbox). Remove the four Phillips-head screws that mount the line cord cover plate to the rear cabinet. Match the prongs on the plug with the holes in the receptacle and push line cord securely into place. Make sure cord is aligned with the indentation of plate (indentation should point toward bottom of cabinet). Remount line cord cover plate. If desired, tamper resistant screws have been provided in an envelope marked "Security Screws" (located in cashbox) to remount cover plate. Prepare the game for player operation.

GAME CONTROL LOCATIONS

Cabinet Switches

The On-Off switch is located on the bottom of the cabinet near the right front leg.

The Start Button is the pushbutton to the left of the coin door on the cabinet exterior. Press the Start button to begin a game, or during the diagnostic mode, to ask for HELP.

Coin Door Switches

The operator controls all game adjustments, obtains bookkeeping information, and diagnoses problems, using only four pushbutton switches mounted on the inside of the coin door. The Coin Door Switches have two modes of operation Normal Function and Test Function.

Normal Function

The Service Credits button puts credits on the game that are not included in any of the game audits.

The Volume Up button raises the sound level of the game. Press and hold the button until the desired level is reached.

The Volume Down button lowers the sound level of the game. Press and hold the button until the desired level is reached. See Adjustment A.1 28 to shut sound OFF completely.

The *Begin Test button starts the Menu System Operation and changes the Coin Door Switches from Normal Function to Test Function.

Test Function

The Escape button exits a menu selection or returns to the Attract Mode.

The Up button cycles forward through the menu selections or adjustment choices.

The Down button cycles backward through the menu selections or adjustment choices.

The *Enter button enters a menu selection or locks in an adjustment choice.

****To reset High Score, hold down the Begin Test/Enter switch for 5 seconds, while in the Attract Mode.***

GAME OPERATION

CAUTION

After assembly and installation at the site location, this game must be plugged into a properly grounded outlet to prevent shock hazard, and to assure proper game operation. DO NOT use a 'cheater' plug to defeat the ground pin on the line cord. DO NOT cut off the ground pin.

POWERING UP. With the coin door closed, plug the game in and switch it On. In normal operation, testing will show in the display as the game performs Start-Up Tests. Once the Start-Up Tests have been successfully completed the last score is displayed. Afterward, the game goes into the Attract Mode.

Note: After the game has been on location for a period of time, the Start-Up Tests may contain messages concerning game problems. See 'Error Messages' for more detailed information regarding messages.

Open the coin door and press the Begin Test Switch. The display shows the game name, number, and software revision. The message changes. The display shows the sound software revision, revision level of the system software and date the game software was revised.

Example:

BLACK ROSE
20013 Rev. L-1

Sound Rev. L-1
Sy.2.03 11/1/91

Press the Enter button to enter the WPC Menu System (refer to the section entitled 'Menu System Operation' for more information). Perform the entire Test Menu routine to verify the game is operating satisfactorily.

ATTRACT MODE*. After completing the Test Menu routine, press the Escape button three times to enter the Attract Mode. During the Attract Mode the display shows a series of messages informing the player of the recent highest scores*, "custom messages*", and the score to achieve to obtain a replay award*

CREDIT POSTING. Insert coin(s). A sound is heard for each coin and the display shows the number of credits purchased. So long as the number of maximum allowable credits* are NOT exceeded by coin purchase or high score, credits are posted correctly.

STARTING A GAME. Press the Start button once. A startup sound plays and the credit amount shown in the display decreases by one. The display flashes 00 (until the first playfield switch is actuated), and shows ball 1. If credits are posted, additional players may enter the game by pressing the Start button once for each player, before the end of play on the first ball.

TILTS. Actuating the Slam Tilt switch inside the cabinet ends the current game and proceeds to the Game Over Mode. With the third closure* of the plumb bob tilt switch, the player loses the remaining play of that ball, but can complete the game.

END OF GAME. All earned scores and bonuses are awarded. If a player's final score exceeds the specified value, the player receives a designated award for achieving the current highest score. A random digit set* appears in the display. Credit* may be awarded when the last two digits of any player's score match the random digits. Match, high score, and game over sounds are made, as appropriate.

GAME OVER MODE. Game Over will show in the display. Afterward, the high scores flash and the game proceeds to the Attract Mode.

*Operator-adjustable feature.

MENU SYSTEM OPERATION

This game operates on a Menu System. The Main Menu allows you to choose from several main categories, which in turn lead to other menus to choose from. To enter the Menu System, open the coin door and press the Begin Test button. The displays show the Game I.D. Mode. Press the Enter button and the Main Menu appears. To cycle through the Main Menu selections press either the Up or Down button. Activate any selection by pressing the Enter button when the desired selection appears in the displays. Return to the Attract Mode or a previous menu selection, press the Escape button. Press the Start button for HELP at any time.

B.6 Time-Stamps

The Time-Stamps Menu allows you to view dates and times that are important to game software.

B.6	01	Current Time
B.6	02	Clock 1st Set
B.6	03	Clock Last Set
B.6	04	Audits Cleared
B.6	05	Coins Cleared
B.6	06	Factory Setting
B.6	07	Last Game Start
B.6	08	Last Replay
B.6	09	Last H.S.T.D. Reset
B.6	10	Champion Reset
B.6	11	Last Printout
B.6	12	Last Service Credit

Press the Enter button to activate the Printouts Menu, once the menu name is shown under the Main Menu. Then, use the Up or Down button to cycle through the Printouts Menu selections. Press the Enter button to activate the desired Printouts group. Press again to return to the Main Menu.

P. PRINTOUTS MENU

(optional board required)

- P.1 Earnings Data**
- P.2 Main Audits**
- P.3 Standard Audits**
- P.4 Feature Audits**
- P.5 Score Histograms**
- P.6 Time Histograms**
- P.7 Time-Stamped**
- P.8 All Data**

The Printouts Menu is a combination of the other menus. This menu allows you to access and print information in the available menu selections.

If no printer is attached the message "Waiting for Printer" appears in the displays.

Note: Set print specification from the Adjustment Menu, A.5 Printer Adjustments.

Press the Enter button to activate the Test Menu, once the menu name is shown under the Main Menu. Then, use the Up or Down button to cycle through the Test Menu selections. Press the Enter button to activate a test. Press the Escape button to return to the Test Menu. Press again to return to the Main Menu. Note: During any test, press the Start button to obtain the wire color, driver number, connector number, and fuse location.

T. TEST MENU

T.1	Switch Edges
T.2	Switch Levels
T.3	Single Switch
T.4	Solenoid Test
T.5	Flasher Test
T.6	General Illumination
T.7	Sound & Music Test
T.8	Single Lamps
T.9	All Lamps
T.10	Lamp & Flasher Tests
T.11	Display Test
T.12	Motor Test

The switch matrix, on the left side of the display, shows the state of all switches. A dot indicates the switch is open, and a square indicates the switch is closed. The numbers assigned to each switch indicate where the switch is located in the matrix. The number on the left indicates the column, and the number on the right indicates the row. Example: Switch 23 is 2nd column, 3rd row.

A short to ground, on either the row or column wire, appears as a shorted row(s). However, a column wire shorted to ground disappears when all the indicated row switches are open. A row wire shorted to ground does not disappear.

A shorted diode in the switch matrix can cause other switches to appear closed. These "phantom" switches (though not actually closed) complete a rectangle in the switch matrix. Therefore, if two switches in the same column are closed (example; #22 and #24), and a third switch is pressed in another column but in the same row as one of the first two (example; #32), the "phantom" switch #34 is falsely indicated as closed. The switch with the shorted diode is diagonally opposite the "phantom" switch (in this case #22).

T.1 Switch Edges

Press each switch one at a time. The name and number of the switch is shown in the display. If a switch other than the one pressed, or no switch at all is indicated, the system has detected a problem with the switch circuit.

T.2 Switch Levels

This test automatically cycles through all switches that are detected closed. The name and number of each switch that is detected is shown in the display. A filled square indicates the switch's position in the matrix.

T.3 Single Switches

The Single Switch Test isolates a particular switch by blocking signals from all other switches. Use the Up or Down buttons to select the switch to be tested.

T.4 Solenoid Test

The Solenoid Test has three modes: Repeat, Stop, and Run. Only one solenoid should pulse at a time. The system has detected a problem if; more then one solenoid pulses, a solenoid comes On and stays On, or during the Repeat or Run modes, no solenoid pulses.

- Repeat - The Repeat mode pulses a single solenoid. After entering this test, Solenoid 1 shows in the display. and the corresponding solenoid activates. Press the Up or Down button to cycle through the solenoids, one at a time. The same solenoid pulses until the Up or Down button is pressed. Either press the Escape button to return to the Test Menu, or press the Enter button to advance to the next mode.
- Stop - The Stop mode halts the Solenoid Test. Press Enter during the Repeat mode and the Solenoid Test Stops. No solenoids should be activated while the test is stopped. Either press the Escape button to return to the Test Menu, or the Enter button to advance to the next mode.
- Running - The Run mode cycles through the solenoids automatically. The display shows the name and number of the solenoid currently being pulsed. Either press the Escape button to return to the Test Menu, or the Enter button to advance to the next mode.

T.5 Flasher Test

This tests the flashlamp part of the solenoid circuit exclusively. This, like the Solenoid Test has three test modes: Repeat, Stop, and Run. During this test, only one flashlamp circuit should pulse at a time. The system has detected a problem if more than one circuit pulses, a circuit stays On, or during the Repeat or Run modes, no circuit pulses.

- Repeat - The Repeat mode pulses a single flashlamp. After entering this test, the name and number of the first flashlamp circuit will show in the display and the corresponding bulb(s) flash. Press the Up or Down button to cycle through all of the flashlamp circuits one at a time. The same circuit pulses until the Up or Down button is pressed. Either press the Escape button to return to the Test Menu, or press the Enter button to advance to the next mode.
- Stop - The Stop mode halts the Flasher Test. No flashlamp circuit should be active during this mode. Either press the Escape button to return to the Test Menu, or the Enter button to advance to the next mode.
- Running - The Run mode cycles through the flashlamps automatically. The display shows the name and number of the flashlamp circuit currently being pulsed and the corresponding bulb(s) flash. Either press the Escape button to return to the Test Menu, or the Enter button to advance to the next mode.

T.6 General Illumination

This test checks all of the General Illumination circuits. There are two modes of operation: Stop and Run.

- Stop - Press the Up or Down buttons to cycle through the General Illumination Test manually. All illumination is tested first, followed by an individual circuit test. The circuit name and number will show in the display while the corresponding lamps light. If any other results occur the system has detected an error.
- Run - Press the Enter button any time during Stop test mode and the General Illumination Test cycles through automatically. For each circuit shown in the displays the corresponding bulbs should light. If any other results occurs the system has detected a problem.

T.7 Sound and Music Test The Sound and Music Test allows you to check the audio circuits. This test has three modes for testing the sound and music circuits: Run, Repeat, and Stop.

- Run - This Run mode steps through a sequence of sounds and music. Pressing the Up or Down button during this portion of the Sound and Music test advances to a particular sound/tune without having to wait for the program to play all the sounds available in the test. A sound/tune should be heard for each name and number that appears in the display. Any other results indicate the system has detected a problem.
- Repeat - Press the Enter button at any time during the Run mode to cause the program to stop and repeat a particular sound/tune. The same sound should repeat continuously until the Up or Down button is pressed. Any other results indicates the system has detected a problem.
- Stop - Press the Enter button at any time during the Repeat mode to stop this test altogether. No sound/tune should be heard. Any other results indicates the system has detected a problem.

T.8 Single Lamp Test The number assigned to each lamp indicates the lamp's position in the matrix. The number on the left indicates the column. The number on the right indicates the row. Example: Lamp 23 means 2nd column, 3rd row.

This test checks each lamp circuit individually. Press the Up or Down button to cycle through this test. For each name and number that is shown in the display the corresponding lamp should light. Any other results indicate the system has detected a problem.

T.9 All Lamps Test This test causes all the controlled lamps to flash at the same time. Every controlled lamp should flash. Any other results indicate the system has detected a problem.

T.10 Lamp and Flasher Test This test causes all the flashlamps and the controlled lamps to flash at the same time. The controlled lamps blink, while the flashlamps cycle from highest to lowest. Any other results indicates the system has detected a problem.

T.11 Display Test This test automatically every dot in the Dot Matrix Display. A series of patterns appear in sequence. Each pattern turns On and Off a section of dots. Every dot on the display should be turned On and Off during this test.

T.12 Cannon Test This test allows the operator to toggle the cannon motor on and off. It also activates the cannon kicker and left lockup coils to allow balls to be kicked out of these devices when testing. The display will show the status of the cannon kicker switch (SW.35 CANNON = OPEN, or SW.35 CANNON = CLOSED), and the motor (MOTOR = ON, or MOTOR = OFF). This test allows for easier adjustment of the cannon kick out range. The cannon should be able to kick the ball out and make the far right shot to the jets, and the far left shot to the lockup. The test buttons are used as follows:

The ENTER, UP, and DOWN buttons will toggle the cannon motor ON or OFF.
The ESCAPE button will return to the Test Menu when pressed at anytime during the test.

Press the Enter button to activate the Utilities Menu, once the menu name is shown under the Main Menu. Then, use the Up or Down button to cycle through the Utility Menu selections. Press the Enter button to activate a selection. Use the Up or Down button to rotate the settings. Press the Enter button to lock in a setting. If a mistake is made while changing a setting, press the Escape button while "Saving Adjustment Value" is still in the display. The original setting is retained and the new setting is ignored. Press the Escape button to return to the Utilities Menu. Press it again to return to the Main Menu.

U. UTILITIES MENU

U.1	Clear Audits
U.2	Clear Coins
U.3	Reset H.S.T.D.
U.4	Set Time & Date
U.5	Custom Message
U.6	Set Game I.D.
U.7	Factory Adjustments
U.8	Factory Resets
U.9	Presets
U.10	Clear Credits
U.11	Auto Burn-In

U.1 Clear Audits

Press the Enter button to clear the Standard Audits, Feature Audits, and Histograms.

U.2 Clear Coins

Press the Enter button to clear the Earnings Audits.

U.3 Reset H.S.T.D.

Press the Enter button to clear the High Score to Date Table and the Grand Champion.

U.4 Set Time and Date

Press the Enter button to activate the time and date. Use the Up or Down button to change the value, then press the Enter button to lock in that value. If a mistake is made, press the Escape button while "Saving Adjustment Value" is displayed. The new value is ignored and the original value is retained.

U.5 Custom Message

Set A.1 20 to YES before writing a Custom Message. Press the Enter button to begin entry of the custom message. Use the Up or Down button to cycle through letters. Use the Start button to cycle through punctuation marks. Press the Enter button to lock in the desired letter and punctuation. If you make a mistake, use Up and Down to select the "back-arrow" character. The "back-arrow" character is located before the space character and after the number nine. Press Enter while the back-arrow shows to erase the previously entered character. Once your message is complete, press and hold the Enter button until "Message Stored" is displayed.

Press the Escape button to cancel the new message. The message "Press Enter to Reset" appears. If you press Enter, the custom message is cleared and no message is displayed. If Escape is pressed, the original message remains intact.

U.6 Set Game I.D.

This utility allows the operator to install a message, such as game location, that only appears on printouts . Press the Enter button to activate Set Game I.D.. Use the Up or Down button to cycle through letters. Use the Start button to cycle through punctuation marks. Press the Enter button to lock in the desired letter and punctuation.

U.7 Factory Adjustment

Press the Enter button to restore the adjustments to factory settings.

U.8 Factory Reset

Press the Enter button to restore the adjustments to their factory setting, clear the Audits, H.S.T.D Table, and Custom Message/Game I.D.

U.9 Presets

Use the Up or Down buttons to cycle through the available Presets. When the desired Preset is displayed, press the Enter button to lock in that Preset. If a mistake is made, press the Escape button while "Saving Adjustment Value" is displayed. The new value is ignored and the original value is retained.

U.9 01 Install Extra Easy

The game play difficulty adjustments can be changed to a combination that is MUCH LESS to MUCH MORE difficult than Factory Settings. The Game Difficulty Setting Table lists the adjustments and settings that comprise the individual groups.

U.9 02 Install Easy

Somewhat LESS difficult than factory setting.

U.9 03 Install Medium

About the SAME as factory setting.

U.9 04 Install Hard

Somewhat MORE difficult than factory setting.

U.9 05 Install Extra Hard

MUCH MORE difficult than factory setting.

U.9 06 Install 5 Ball

U.9 07 Install 3 Ball

Adjustments U.9 06 and U.9 07 can be used to change a game to 3 or 5 ball play, including the changing of certain features to the recommended 3- and 5-ball level. The Preset Game Adjustments Table for U.S./Canadian Games lists the adjustments and settings that comprise the individual groups.

Preset Game Adjustments Table for U.S./Canadian Games

Adjustment Number	Adjustment Description	Install 5-Ball U.9 06	Install 3 Ball U.9 07
A.1 01	Balls Per Game	5	3
A.1 07	Replay Start	35,000,000	20,000,000
A.2 30	Consolation Ramp/Extra Ball	90 Seconds	60 Seconds

U.9 08 Install Add-A-Ball

This option deletes all Free Play awards and replace them with Extra Ball awards. Individual adjustments are affected, as follows:

<u>Adjustment</u>	<u>Name</u>	<u>New Setting</u>
A.1 13	Replay Boost	Off
A.1 14	Replay Award	Extra Ball
A.1 15	Special Award	Extra Ball
A.1 17	Extra Ball Ticket	No
A.1 19	Match Feature	Off
A.4 04	Champion Credits	00
A.4 05	High Score 1 Credits	00
A.4 06	High Score 2 Credits	00
A.4 08	High Score 3 Credits	00
A.4 07	High Score 4 Credits	00

U.9 09 Install Ticket

This option deletes Credit awards and replace them with Ticket awards. Individual adjustments are affected, as follows:

<u>Adjustment</u>	<u>Name</u>	<u>New Setting</u>
A.1 14	Replay Award	Ticket
A.1 15	Special Award	Ticket
A.1 16	Match Award	Ticket
A.1 17	Extra Ball Ticket	Yes
A.1 31	Ticket Expansion Board	Yes
A.4 02	H.S.T.D. Award	Ticket

U.9 10 Install Novelty

This option removes all Free Play and Extra Ball awards. Individual adjustments are affected, as follows:

<u>Adjustment</u>	<u>Name</u>	<u>New Setting</u>
A.1 04	Max. Extra Ball	Off
A.1 05	Replay System	Fixed
A.1 09	Replay Level 1	Off
A.1 10	Replay Level 2	Off
A.1 11	Replay Level 3	Off
A.1 12	Replay Level 4	Off
A.1 15	Special Award	Points
A.1 19	Match Feature	Off
A.4 01	Highest Score	On
A.4 04	Champion Credits	00
A.4 05	High Score 1 Credits	00
A.4 06	High Score 2 Credits	00
A.4 07	High Score 3 Credits	00
A.4 08	High Score 4 Credits	00

U.9 11 Install Buy-in

This option automatically sets game pricing to 1 for 50¢/2 for \$1.00, and 1 Coin Buy-in (A.3 19) to YES.

U.9 12 through 16 Not Used

U.9 17 through 28 For International games only, see section four.

U.10 Clear Credits

Press the Enter button to clear the game Credits.

U.11 Auto Burn-in

Press the Enter button to activate Auto Burn-in. This utility allows you to automatically cycle through several tests. This will help in find intermittent problems. The tests that Auto Burn-in cycle through are: the Display Test, Sound and Music Test, All Lamps Test, Solenoid Test, Flashers Test, and General Illumination Test.

Press the Enter button to activate the Adjustments Menu, once the menu name is shown under the Main Menu. Press the Up or Down button to cycle through the Adjustment Menu selections. Press the Enter button to activate the selection. Press the Up or Down button to cycle through the available adjustments. Press the Enter button to activate an adjustment. When an adjustment is activated, the setting value begins to flash. Use the Up or Down button to raise or lower the setting value. Press Enter to lock in the value. If a mistake is made, press the Escape button while "Saving Adjustment Value" is displayed. The new value is ignored and the original value is retained. Press the Enter button to return to the Adjustments Menu. Press it again to return to the Main Menu.

A. ADJUSTMENTS MENU

- A.1 Standard Adjustments**
- A.2 Feature Adjustments**
- A.3 Pricing Adjustments**
- A.4 H.S.T.D Adjustments**
- A.5 Printer Adjustments (optional board required)**

A.1 Standard Adjustments

A.1 01 Balls Per Game

A "game" is defined by specifying the number of balls to be played.

Range: 1-10

A.1 02 Tilt Warnings

The number of total actuations of the plumb bob mechanism that can occur before the game is "tilted".

Range: 1-10

A.1 03 Maximum Extra Balls

The number of extra balls that a player may accumulate.

Range: 1-10

A.1 04 Maximum Extra Balls/Ball in Play

The number of extra balls to be awarded per ball in play.

OFF - No maximum number of Extra Balls per ball in play.

1-10 - 1 through 10 Extra Balls per ball in play.

A.1 05 Replay System

The type of replay system to be used.

Fixed - Replay value is set and does not change during game play.

Auto% - Replay starting value is set and changes every 50 games to comply with the percentage of replays desired.

A.1 06 Replay Percent*

The percentage of replays the players are able to earn when Auto Replay is used.

Range: 5-50%

A.1 07 Replay Start*

The replay start value when Auto% Replay is used. The range of this setting is 1, 000, 000 to 20, 000, 000.

A.1 08 Replay Levels*

The number of replay levels used by the Auto% Replay mode. The range of this setting is 1 to 4. When two replay levels are chosen, the second replay level is automatically adjusted to twice the starting replay level value. When three of four replay levels are chosen, their values are automatically adjusted to three or four times the starting replay level.

*For Auto % Replay.

A.1 09 Replay Level 1

A.1 10 Replay Level 2

A.1 11 Replay Level 3

A.1 12 Replay Level 4

The values used for the 1st through 4th levels of Fixed Replay. Range: 00 - 25,000,000.

A.1 13 Replay Boost

The replay score can be temporarily boosted by the selected amount EACH time the player reaches or exceeds the replay score. This temporary boost is canceled when credits equal 0, the player inserts another coin, or Begin Test is pressed.

ON	-	Score is boosted between 500, 000 and 5, 000, 000 points.
OFF	-	Replay score is not boosted.

A.1 14 Replay Award

For the form of award automatically provided when the player exceeds any replay level for either Auto% Replay, or Fixed Replay.

Credit	-	Reaching each Replay level awards credit.
Ticket	-	Reaching each Replay level awards a ticket.
Ball	-	Reaching each Replay level awards an Extra Ball.
Audit	-	Reaching each Replay level awards nothing to the player; it does increase the entry value of the Audit Item(s) maintaining a tally of these awards.

A.1 15 Special Award

The award automatically provided when the player scores a special.

Credit	-	Scoring a Special awards a Credit.
Ticket	-	Scoring a Special awards a Ticket.
Ball	-	Scoring a Special awards an Extra Ball.
Points	-	Scoring a Special awards 1 Million points.

A.1 16 Match Award

The award automatically provided when the players wins a match.

Credit	-	Winning a Match awards a Credit.
Ticket	-	Winning a Match awards a Ticket.

A.1 17 Extra Ball Ticket

A Ticket is awarded when the player earns an Extra Ball.

YES	-	The player is awarded a Ticket in addition to an Extra Ball.
NO	-	The player is not awarded a Ticket.

A.1 18 Maximum Ticket/Player

The amount of Tickets each player can earn.
Range 00 - 100

A.1 19 Match Feature

The desired percentage for the Match Feature occurring at the end of the game.

OFF - Match Feature is not available.
1 -50% - 1% is 'hard'; 50% is 'extremely easy'. The Match Feature selects a random two-digit number at the end of the game and compares each players score for an identical two digits in the rightmost two positions. A matching of these two digits results in an award of a Credit or a Ticket.

A.1 20 Custom Message

The message displayed during the Attract Mode.

YES - A message is displayed
NO - A message is not displayed.

A.1 21 Language

The language the game uses: English, French, or German.

A.1 22 Clock Style

The style of clock the game uses: A.M./P.M., or 24 Hours.

A.1 23 Date Style

The style of date the game uses: Month/Date/Year, or Date/Month/Year.

A.1 24 Show Date and Time

The date and time show in the Attract Mode.

YES - Show date and time in status report, or Attract Mode.
NO - Do Not show date and time in status report or Attract Mode.

A.1 25 Allow Dim Illumination

The game program dims the General Illumination for special effects during the Attract Mode.

YES - Dim General Illumination during Attract Mode.
NO - Do Not dim General Illumination.

A.1 26 Tournament Play

Equalize Multiball and Jackpots during multi-player games, (do not carry over to next player).

YES - Keep Multiball and Jackpots equal.
NO - Do Not Keep Multiball and Jackpots equal.

A.1 27 Euro. Scr. Format

Use either commas or dots between digits when numbers are displayed.

- YES - Dots instead of commas, (example 1.000.000).
- NO - Commas instead of dots, (example 1,000,000).

A.1 28 Minimum Volume Control

The volume can be turned Off.

- YES - Volume can be turned Off.
- NO - Volume can be turned Down but not Off.

A.1 29 General Illumination Power Saver

This allows the general illumination and controlled lamps to be dimmed following a time interval after a game is played. Power Saver Level (A.1 30) determines how dimness of lamps. Using this feature will substantially increase the life of the lamps.

Setting: - Off, 2-60 Minutes

A.1 30 Power Saver Level

When General Illumination Power Saver (A.1 29) is set to On, this controls the intensity of the G.I. and controlled lamps once the game has been idle for a specified period of time.

Range: 4-7

A.1 31 Ticket Expansion Board

When a Ticket Expansion Board is connected, full control of the ticket dispenser is available. This includes a ticket low/error lamp, resume on ticket jam switch, and manual ticket dispense switch.

- Yes - Ticket Expansion Board is connected.
- No - Ticket Expansion Board is NOT installed in the game.

A.1 32 No Bonus Flips

The activation of flippers during the end of ball "bonus" sequence. Setting this to "YES" may extend the life of the flipper mechanisms.

A.1 33 Game Restart

When the start button is pressed during or after the 2nd ball, the game in progress will end and a new game will begin. This adjustment has 3 settings to determine how this is handled.

- Never: - Do not allow a new game to start until the current game is over.
- Slow: - Restart if the start button is pressed continuously for over 1/2 second. This helps to prevent the unintended restart of game in progress.
- Instantly: - Restart as soon as the start button is pressed.

When the start button is pressed during game over, or during the 1st ball (to add a player), it is always handled instantly.

A.2 Feature Adjustments

A.2 01 LOCK TIME-DOWN RATE

The rate at which a ball will be held in lockup during two ball multiball. Setting range is from 1 to 99 seconds.

Factory Default: 20 Seconds

A.2 02 RIGHT RAMP TIME-DOWN RATE

The rate at which the five lights in front of the right ramp time-down once lit. Setting range is from 1 to 99 seconds.

Factory Default: 20 Seconds

A.2 03 MIDDLE RAMP OPEN

The number of consecutive middle ramp loops that are needed to open the middle ramp. Setting range is from 1 to 10 loops.

Factory Default: 2 Loops

A.2 04 MIDDLE RAMP OPEN MAXIMUM COUNT

The highest number of consecutive middle ramp loops that are needed to open the middle ramp. Setting range is from 2 to 20 loops.

Factory Default: 6 Loops

A.2 05 COMBINATION SHOT 1 TIME-DOWN

The rate at which the first combination shot times down once lit (top left loop). Setting range is from 1 to 99 seconds.

Factory Default: 5 Seconds

A.2 06 COMBINATION SHOT 2 TIME-DOWN

The rate at which the second combination shot times down once lit (far right shot). Setting range is from 1 to 99 seconds.

Factory Default: 5 Seconds

A.2 07 CANNON RELOAD TIME-DOWN RATE

The rate at which the ramp stays open after the cannon is shot and missed allowing an instant reload. Setting range is from 1 to 99 seconds.

Factory Default: 20 Seconds

A.2 08 MIDDLE RAMP TIME-DOWN RATE

The rate at which the three lights in front of the middle ramp time-down once lit. Setting range is from 5 to 99 seconds.

Factory Default: 6 Seconds

A.2 09 EXTRA BALL RANDOM AWARD

The percentage of times the game will award or offer an extra ball when Rigging Swing, Walk the Plank, Knife Throw, or Polly is activated. Percentage is based on total number of extra balls collected, skill or random. Setting range is from 1 to 99 percent.

Factory Default: 20 Percent

A.2 10 JACKPOT LIT RANDOM AWARD

The percentage of times the game will award or offer Jackpot Lit when Rigging Swing, Walk the Plank, Knife Throw, or Polly is activated. Percentage is based on total number of Jackpot Lits collected, skill or random. Setting range is from 1 to 99 percent.

Factory Default: 15 Percent

A.2 11 RANDOM GAME AWARDS

The awards given or offered in the Rigging Swing, Walk the Plank, Knife Throw, and Polly. When Extra Ball or Jackpot Lit is not given by a random award, then the award given will be based on this adjustment.

EASY	- Valuable point/features will be awarded more often.
MEDIUM	- Valuable point/features will be awarded evenly.
HARD	- Valuable point/features will be awarded less often.

Factory Default: MEDIUM

A.2 12 SKILL SHOT LEVEL

The difficulty of the plunger skill shot.

EASY	- Skill shot has only one level of difficulty.
MEDIUM	- Skill shot has two levels of difficulty.
HARD	- Skill shot has three levels of difficulty.

Factory Default: EASY

A.2 13 HIDDEN TREASURE

The way Hidden Treasure Mode works from player to player, and game to game.

ALWAYS	- Jewels hold over from game to game, all players share the same set of jewels.
PLAYER	- Jewels hold over from game to game (last player), each player has their own set of jewels.
GAME	- Jewels are reset at the start of each game, all players share the same set of jewels.

Factory Default: ALWAYS

A.2 14 HIDDEN TREASURE JEWEL RESET

The number of jewels needed for Hidden Treasure Mode to start.

Factory Default: 6 Jewels

A.2 15 MILLIONS MODE TIME-DOWN RATE

The amount of time Millions Mode will be active once collected. Setting range is from 5 to 99 seconds.

Factory Default: 30 Seconds

A.2 16 LOCK ENABLE DIFFICULTY

The way a lock can be enabled.

- | | | |
|-------------|---|---|
| EASY | - | Lock light lanes remain lit after MULTIBALL. |
| HARD | - | Lock lanes are cleared at the end of MULTIBALL. |

Factory Default: HARD

A.2 17 BROADSIDE BONUS LITE

How the center broadside bonus feature is lit.

- | | | |
|---------------|---|---|
| EASY | - | Broadside is lit (turned on) at the start of each ball. |
| MEDIUM | - | Broadside is carried over from ball to ball. |
| HARD | - | Broadside is turned off at the start of each ball. |

Factory Default: EASY

A.2 18 CANNON SHOTS RESET

Select whether or not the cannon shot jewels will be cleared, or reset after sinking a ship.
NOTE: This adjustment is only used if A.2 26 CANNON SHOT FEATURE LEVELS is set to OFF and A.2 27 CANNON FEATURE LEVEL START is set to 0.

- | | | |
|-------------|---|---|
| EASY | - | Cannon shot jewels are reset after sinking a ship. |
| HARD | - | All cannon shot jewels must be collected for a reset. |

Factory Default: EASY

A.2 19 ATTRACT MODE SOUNDS

Select whether or not the attract mode has sound to attract the player.

- | | | |
|------------|---|---------------------------------------|
| ON | - | The attract mode does have sound. |
| OFF | - | The attract mode does not have sound. |

Factory Default: OFF

A.2 20 SPECIAL LIT PERCENTAGE

The percentage of times the game will lite Special after sinking 'X' number of ships ('X' is set by adjustment A.2 21 SPECIAL LIT). If Special has been collected within this percentage, the Special Lit timer will last 10 seconds. If Special has not been collected within this percentage, the Special Lit timer will last 30 seconds. The setting range is 1 to 99 percent.

Factory Default: 7 Percent

A.2 21 SPECIAL LIT AFTER 'X' NUMBER OF SHIPS

The number of ships that must be sunk before Special is lit. Setting range is from 1 to 9 ships sunk.

Factory Default: 2 SHIPS SUNK

A.2 22 SWING FROM THE RIGGINGS VIDEO GAME LEVEL START

The level of difficulty in which the SWING FROM THE RIGGING game starts. Setting range level is from 1 to 4. Level 1 is the easiest and level 4 is the hardest.

Factory Default: Level 1

A.2 23 WALK THE PLANK VIDEO GAME LEVEL START

The level of difficulty in which the WALK THE PLANK game starts. Setting range level is from 1 to 4. Level 1 is the easiest and level 4 is the hardest.

Factory Default: Level 1

A.2 24 KNIFE THROW VIDEO GAME LEVEL START

The level of difficulty in which the KNIFE THROW game starts. Setting range level is from 1 to 4. Level 1 is the easiest and level 4 is the hardest.

Factory Default: Level 1

A.2 25 VIDEO GAMES LEVELS

Select whether or not the video games automatically get one level harder each time they are played.

- | | |
|------------|---|
| ON | - Video games get one level harder each time played. |
| OFF | - Video games stay at the level selected in adjustments A.2 21, A.2 22, and A.2 23. |

Factory Default: ON

A.2 26 CANNON SHOT FEATURE LEVELS

Select whether or not the cannon shot feature level remains fixed on one level, or goes up one level each time the feature is collected.

- | | |
|------------|---|
| ON | - Cannon shot feature level goes up each time collected. |
| OFF | - Cannon shot feature level stays fixed at level set by adjustment A.2 27 CANNON FEATURE LEVEL START. |

Factory Default: ON

A.2 27 CANNON FEATURE LEVEL START

The level at which the cannon shot feature will start. *NOTE:* If this adjustment is set to level ZERO, then the cannon shot features will be turned off and only letters will be awarded for the cannon shot. All cannon shots must then be hit once before they can be hit again. Also see A.2 18 CANNON SHOT RESET. Settings range level is from 0 to 15.

Factory Default: Level 1

A.2 28 DOUBLE BROADSIDE MODE TIME-DOWN RATE

The time that Double Broadside mode will be active once collected. Setting range is from 5 to 99 seconds.

Factory Default: 30 Seconds

A.2 29 BALL SAVER

The amount of time that the ball saver is active per ball. *NOTE:* Ball saver will return the ball to the shooter if the player has not had 'X' amount of play time that ball.

- 0** - Ball saver is turned off.
- 1-30** - Number of ball play time seconds that the ball will be returned to the player is lost.

Factory Default: 7 Seconds

A.2 30 CONSOLATION LOCKER OPEN/EXTRA BALL TIME

Choose whether a less skilled player can obtain an extra ball easier and have the locker (ramp) open at the start of the players last ball. An extra ball will be easier to collect and the locker (ramp) will open on the players last ball if their score is less than 3 million points and their game time is less than or equal to the CONSOLATION LOCKER/EXTRA BALL TIME.

- OFF** - Turn OFF Consolation Locker (ramp) Open/Extra Ball.
- 1-99** - Number of game time seconds for Locker (ramp) Open/Extra Ball.

Factory Default: 60 Seconds

A.2 31 MULTIBALL MULTI BONUS RESET

Select whether or not Multiball 'MULTI BONUS' resets after each multiball, or is carried over from each multiball mode that game.

- EASY** - MULTI BONUS carries over from multiball to multiball.
- HARD** - MULTI BONUS resets after each multiball.

Factory Default: EASY

A.2 32 SINKSHIP LETTERS LITE AT GAME START

Select the number of letters in SINKSHIP are lit at the start of a game. The more letters lit the easier it is to sink a ship.

- ALL OFF** - No letters are lit at game start.
- S-SINKSHIP** - 1 to 8 letters are lit at game start.

Factory Default: SINK letters lit.

A.2 33 MOST SHIPS SUNK HIGH SCORE BACKUP

The starting number of ships the player must sink to get a Most Ships Sunk High Score. This value is used whenever the game has been Factory Restored (U.8), or Factory Adjusted (U.7). Setting range is 1 to 20 ships sunk.

Factory Default: 2 ships sunk.

A.2 34 SINKSHIP LETTERS DIFFICULTY

Select how SINKSHIP letters are collected during multiball.

- EASY** - All ramps light 1 letter in SINKSHIP during 2 ball multiball, and all ramps light 2 letters in SINKSHIP during 3 ball multiball.
- MEDIUM** - Right and left ramps light 1 letter in SINKSHIP during 2 ball multiball, and right and left ramps light 2 letters in SINKSHIP during 3 ball multiball.
- HARD** - Right and left ramp alternately light 1 letter in SINKSHIP during 2 ball multiball, and right and left ramps light 1 letter in SINKSHIP during 3 ball multiball.

Factory Default: EASY

A.2 35 VIDEO MODE FLIPPERS

Select whether or not the flipper buttons will be used in the video game modes (Rigging Swing, Walk the Plank, Knife Throw). If the fire button on the front molding breaks or is lost, set this adjustment ON to allow the flipper buttons to work the same as the fire button did in the video game modes.

- ON** - Flipper buttons will work the same way as the front molding fire button during video game modes.
- OFF** - Flippers will NOT work during video game modes.

Factory Default: ON

A.3 Pricing Adjustments

A.3 01 Game Pricing (if set to custom, then 02 to 09 are available)

The cost of a game is selected from the Standard Pricing Table or by installing Custom pricing.

A.3 02 Left Coin Units

A.3 03 Center Coin Units

A.3 04 Right Coin Units

A.3 05 4th Slot Units

The number of coin units purchased by a coin passing through the left, center, right, and fourth coin chutes.

A.3 06 Units/Credits

Defines the number of coin units required to obtain 1 credit. A coin unit counter in the game program totals the number of coin units purchased through all coin chutes prior to each game. If the total number of these coin units exceeds or matches the Unit per Credit value by a multiple (or more, coin units) of the specified Units per Credit value the Credits display shows the proper number of credits. The coin unit counter retains any remaining coin units, until the start of Ball 2; then the coin unit counter is cleared (its contents are zeroed).

A.3 07 Units/Bonus

Additional credits are to be indicated in the credits display, when a certain number of coin units are accumulated.

A.3 08 Bonus Credits

The number of credits that are awarded when the Units/Bonus level is achieved.

A.3 09 Minimum Units

No credits are to be posted (indicated in the credit display), until the credits unit counter reaches a particular value, by setting this value to 02 (or more).

A.3 10 Coin Door Type (if set to custom, then 11 to 15 are available)

This adjustment is used to preset adjustments 11 through 15, based on standard coin doors (U.S.A., German, Etc.).

A.3 11 Collection Text

The coin system used to display the Earning Audits.

A.3 12 Left Slot Value

A.3 13 Center Slot Value

A.3 14 Right Slot Value

A.3 15 4th Slot Value

The monetary value of the left, center, right, and 4th coin chutes.

A.3 16 Maximum Credits

The maximum number of credits the game can accumulate, either through game play awards or coin purchases. The range of this setting is 5 through 10. Reaching the specified setting prevents the award of any credits.

A.3 17 Free Play

The player can operate the game without a coin (free play) or with a coin.

- NO - A coin is necessary for game play.
YES - Game play is free; no coin required.

A.3 18 Hide Coin Audits

The coin audits may, or may not be displayed.

- YES - The coin audits are not displayed.
NO - The coin audits are displayed.
HIDE NAMES - The coin audit value is shown but not the audit name.

A.3 19 1 Coin Buy-in

If game pricing is set to 1 for 50¢/2 for \$1.00 the player is allowed to 'buy-in' a subsequent game for 1 coin. The number of games that may be purchased at this cost is determined by the number of players in the previous game; that is, if the previous game had three players, 3 Credits can be purchased at the rate of 1 coin per credit.

- YES - The player has 10 seconds to buy-in at 1 coin per game.
NO - The buy-in feature is disabled.

A.3 20 Base Coin Size

The number of ticket per coin calculations.

A.3 21 Coin Meter Units

It is possible to connect a coin meter to the knocker coil driver which will log all coins through all slots. This adjustment activates the use of the knocker driver for this purpose, and determines the value of each unit on the meter. For example, to show the total amount of money collected as "total quarters", set this adjustment to "0.25". To show the amount of money collected as "total dollars", set this adjustment to "1.00".

Setting this adjustment to anything other than Off establishes the coin unit for a meter attached to the knocker driver, and overrides use of the knocker during awards.

Pricing Table U.S./Canada

Country	Coin Chute				Games/Coin	Display	Pricing Adjustments A.3								
	Left	Center	Right	Chute			02	03	04	05	06	07	08	09	
USA	25 ¢	*\$1.00	25¢	-	1/25¢, 4/\$1 ² 1/50¢, 2/75¢, 3/\$1 ^{1,2} 1/50¢, 2/\$1 ² 1/25¢, 3/\$1 ² 1/25¢, 3/50¢, 6/\$1 1/25¢, 5/\$1	U.S.A. 4/\$1.00 50-75-1.00 U.S.A. 2/\$1.00 U.S.A. 3/\$1.00 CUSTOM CUSTOM	01 04 01 00 01 02 01 00 01 00 01 00 01 04 01 00								
Canada	25 ¢	-	\$1.00	-	1/50¢, 2/75¢, 3/\$1 ² 1/50¢, 2/\$1 ²	CANADA 1 CANADA 2									

NOTES: 1. Factory Default. 2. Standard Setting - Change by pressing Enter button. 3. Other functions are also affected.
* Only if center coin chute and dollar bill acceptor are available.

A.4 H.S.T.D. Adjustments

A.4 01 Highest Scores

The game maintains a record of the four highest scores achieved to date.

- OFF - No high scores are recorded, or displayed.
- ON - The four highest scores are stored in memory and displayed in the Attract Mode.

A.4 02 H.S.T.D. Award

The award given for achieving the High Score To Date, or the Champion H.S.T.D: Credit or Ticket.

A.4 03 Champion H.S.T.D.

The "Highest" High Score is displayed in the Attract Mode. This score is not cleared when "High Score Reset Every" occurs.

- ON - The "Highest" High Score is retained in memory and is displayed.
- OFF - The "Highest" High Score is not retained.

A.4 04 Champion Credits

The operator chooses the number of credits or tickets awarded for a Grand Champion Score. Range: 00 - 10.

A.4 05 H.S.T.D. 1 Credits

A.4 06 H.S.T.D. 2 Credits

A.4 07 H.S.T.D. 3 Credits

A.4 08 H.S.T.D. 4 Credits

The number of credits or tickets to be awarded whenever a player exceeds the 1st, 2nd, 3rd, and 4th highest scores. Range: 00 - 10.

A.4 09 High Score Reset Every

The number of games to be played before an automatic reset of the displayed "Highest Score" occurs. The values provided upon reset are those selected by the operator in the Back-up High Scores. Range: OFF (disabled); 250 to 20, 000.

A.4 10 Backup Champion

The Back-up Grand Champion Score. Range: 00 - 99,900,000.

A.4 11 Backup H.S.T.D. 1

A.4 12 Backup H.S.T.D. 2

A.4 13 Backup H.S.T.D. 3

A.4 14 Backup H.S.T.D. 4

The first through the fourth Back-up High Score values. The game automatically restores this value when the High Score Reset Every value is reached. Range: 00 - 99,900,000.

A.5 Printer Adjustments (optional board required)

A.5 01 Column Width

The column width to be printed. Range: 22 - 80.

A.5 02 Lines Per Page

The amount of lines per page. Range: 20 - 80.

A.5 03 Pause Every Page

Choose whether the printer pauses at the end of a page.

- | | | |
|-----|---|-----------------------------|
| YES | - | The printer does pause. |
| NO | - | The printer does not pause. |

A.5 04 Printer Type

Select the type of printer . Choices: Parallel, Serial, or ADP.

A.5 05 Serial Baud Rate

The baud rate used for Serial or ADP communications (bit rate). Choices: 300, 600, 1200, 2400, 4800, or 9600.

A.5 06 Serial D.T.R. (Data Terminal Ready)

When a Serial Printer is used, this line may be connected to a printer output line signaling that the printer is busy.

- | | | |
|----------|---|---|
| Normal | - | Normal D.T.R. signal goes low to indicate the printer is not ready. |
| Inverted | - | Inverted D.T.R. (busy) signal goes high to indicate printer is not ready. |
| Ignore | - | D.T.R. signal is ignored. |

ERROR MESSAGES

The WPC game program has the capability to aid the operator and service personnel. At Game Turn-on, or after pressing the Begin Test switch, (once the game has been operating for an extended period), the display may signal with the message, "Press ENTER for Test Report". This indicates the game program has detected a possible problem with the game.

To obtain details of the problem, open the coin door and press the Begin Test switch. Press the Enter button to begin displaying the message(s). The following messages apply to your game.

Check Switch ##.

This message indicates that at least one switch was stuck 'On' at game turn-on or has NOT been actuated during ball play (for 90 balls or ≈ 30 games). The game program compensates the game play requirements affected by each disabled switch to allow 'nearly normal' play. This helps keep the game earning, until the service technician can repair the problem.

To verify the problem, refer to the Test Menu text describing Switch Testing, and check each reported switch using applicable switch tests. Always check switch operation using a ball, to simulate game conditions. Switch problems may often be resolved by adjusting the wire switch actuators, fixing switch circuitry problems, securing loose connectors, etc. Mechanisms using 'opto switches' (drop targets, etc.) need to be checked for proper power connections (+12V dc and ground).

Pinball Missing.

This game normally uses three balls; however, it will operate with one ball. This message announces that a ball is missing or stuck. When the ball is located, return it to the game via the Outhole. Other possibilities for this problem could be malfunctions of the Ball Trough switches or the Ball Shooter switch.

xxxxx Sw. is Stuck On.

This message indicates that a switch, which is not usually On, remains in the On position after the game is switched On. The stuck switch is essential for game play (for example, a coin chute switch, the slam tilt switch, the plumb bob tilt switch), and should be cleared to permit proper game operation.

Ground Short Row-N, Wht-xxx.

This message indicates that the switch wires being called out are touching a grounded part on the playfield or coin door. The following should be checked:

1. Slam Tilt (or other coin door) switch touching the grounded coin door.
2. A leaf-type, playfield switch touching a grounded part.
3. Players poking metallic objects (wires, coat hanger, etc.) into the game
4. Switch cable insulation pierced or damaged allowing bare wire contact with a grounded part
5. All switches in a row closing at the same time. Note: This instance is NOT a switch problem; however, for most games this is a very rare possibility.

Factory Settings Restored.

This message indicates that the CMOS RAM no longer retains any custom Pricing or Game Adjustment settings and has reverted to factory default settings. Generally, the following CPU checks will isolate the cause of the CMOS RAM memory failure. The voltage at pin 28 and pin 26 of U8 should be +5V (game turned On) and at least +4V (game turned Off). When the voltage drops below +4 V, memory reset occurs. Check the batteries and battery holder. Be sure that the batteries are good and that there is no contamination on the battery holder terminals. Turn the game OFF, and use an ohmmeter to check diodes D1 and D2 on the CPU Board. D1 should read 0 ohms when forward-biased and infinite ohms when reverse-biased. D2 should read 15 ohms when forward-biased and infinite ohms when reverse-biased. Note: Readings taken from Analog Meter. This message can also indicate that there is an open diode on a 50V coil and noise is entering the circuit.

U6 Checksum Error.

The game ROM checksum is invalid. If this occurs replace the game ROM.

Time and Date Not Set.

The real time clock is not running. If this occurs go to U.4 of the Utilities Menu and set the time and date.

Warning Ramp Open/Closed Not Reliable

This message indicates there is a problem with the up/down ramp reliably opening or closing. This means the ramp will sometimes not close or open when told to. Check to make sure switch 54, ramp down, is definitely closed when the ramp is down, and positively open when the ramp is up. Check the wires for loose connections or improper wiring. Also, check to make sure the ramp up coil (10), and the ramp down coil (11), are functioning properly. Make sure the mechanical mechanism is working smoothly. The ramp flap should be able to move up and down freely.

Error-Ramp not opening/closing-check sw./CL.

This message indicates there is a problem with the up/down ramp opening or closing. The ramp has failed to open or close after three tries in a row. Check to make sure switch 54, ramp down, is definitely closed when the ramp is down, and positively open when the ramp is up. Check the wires for loose connections or improper wiring. Also, check to make sure the ramp up coil (10), and the ramp down coil (11), are functioning properly. Make sure the mechanical mechanism is working smoothly. The ramp flap should be able to move up and down freely.

CPU L.E.D.'s

The CPU has three L.E.D.'s located on the upper left side of the board: D19, D20, and D21. On game power-up D19 and D21 turn On for a moment then, D19 turns Off and D20 starts to blink rapidly. D21 remains On. The system has detected a problem if the following happens:

CPU Board L.E.D. Error Codes

Center L.E.D. blinks one time	-	ROM Error U6
Center L.E.D. blinks two times	-	RAM Error U8
Center L.E.D. blinks three times	-	Custom Chip Failure U9

Sound Board Beep Error Codes Upon Game Turn-On:

1 Beep	=	Sound Board O.K.
2 Beeps	=	U9 Failure (RAM)
3 Beeps	=	U18 Failure (ROM)
4 Beeps	=	U15 Failure (ROM), if used
5 Beeps	=	U14 Failure (ROM), if used

LED List

CPU Board

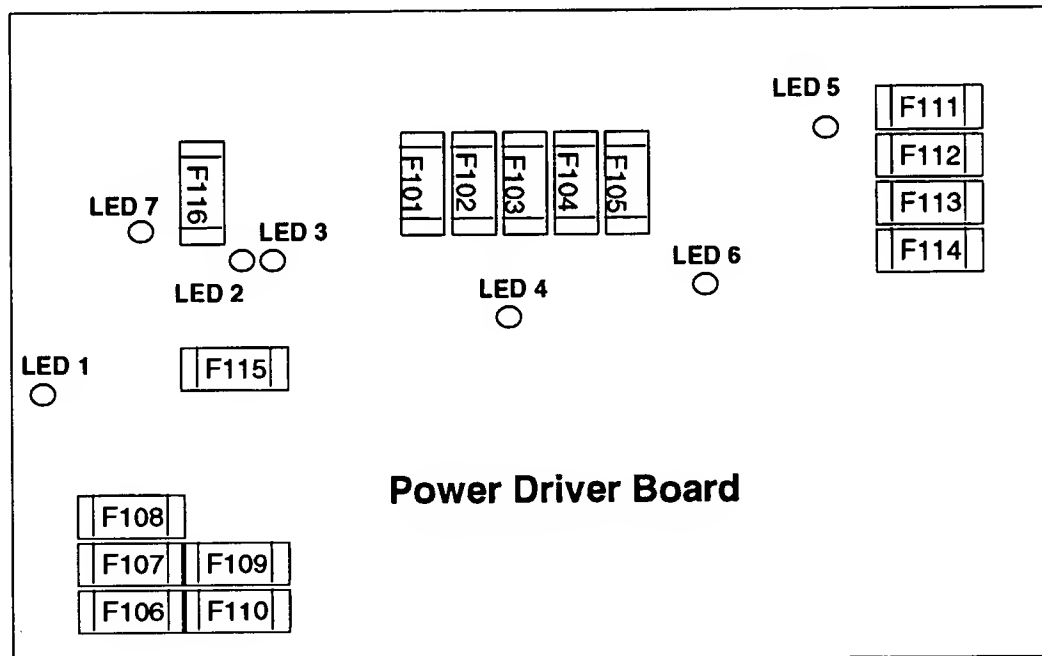

D19, Blanking

D20, Diagnostic

D21, +5vdc

At Game Turn-On = D19 & D21 On, D20 Off

During Normal Operation = D19 Off, D20 flashing, D21 On

MAINTENANCE INFORMATION

LUBRICATION

The two main lubrication points of the Ball Shooter Lane Feeder mechanism are the pivots for the arm. The mechanism of other playfield devices are somewhat similar and have the same lubrication requirements. A medium viscosity oil (switch target grease) is satisfactory for these devices.

Because of the functional design (arm-actuated via solenoid plunger operation), the pivot points of the Left and Right Kickers ("Slingshots") all require lubrication as a regular servicing procedure.

Lubrication to ensure proper operation also applies to the target blades of Drop Targets. MBI Instrument Grease, also known as Drop Target Switch Lubricant, (Williams' part number of EI 165), is a recommended lubricant.

SWITCH CONTACTS

Playfield Switches

For proper game operation, switch contacts should be free of dust, dirt, contamination, and corrosion. Blade switch contacts are plated to resist corrosion. Cleaning blade switch contacts requires gentle closing of the contacts on a clean business card or piece of paper, and then pulling the paper about 2 inches, which should restore the clean contact surface. Adjust the switch contacts to a 1/16-inch gap.

Flipper Switches

This game uses the new Fliptronic II Electronic Flipper System. The end-of-stroke switches are NORMALLY OPEN and should close when the flipper is energized. All end-of-stroke switches and flipper button cabinet switches are gold flashed computer grade leaf switches. Only low computer current is carried through these switches. DO NOT FILE or abrasively clean these switches! DO NOT REPLACE these switches with the old style tungsten high current type switches, as intermittent operation could occur. Please note that unlike the old style of flipper, an end-of-stroke switch failure will not harm the flipper. The game will notify the operator of a switch being mis-adjusted in the test report, but will continue to play. The end-of-stroke switches are a means by which the new electronic flippers feel and play with all of the subtleties of the old flippers.

CLEANING

Good game action and extended playfield life are the results of regular playfield cleaning. During each collection stop, the playfield glass should be removed and thoroughly cleaned and the playfield should be wiped off with a clean, lint-free cloth. The game balls should be cleaned and inspected for any chips, nicks, or pits. Replace any damaged balls to prevent playfield damage.

Regular, more extensive, playfield cleaning is recommended. However, avoid excessive use of water and caustic or abrasive cleaners because they tend to damage the playfield surface. Playfield wax (or any carnauba based wax), or polish may be used sparingly, to prevent a buildup on the playfield surface. Do not use cleaners containing petroleum distillates on any playfield plastics because they may dissolve the plastic material or damage the artwork.

CANNON ASSEMBLY

READ ALL INSTRUCTIONS BEFORE BEGINNING

CLIP INSTALLATION

It is a necessity that the Cannon Mounting Ring have the reinforcing clips attached prior to screwing in the Post Assembly. *Missing clips could result in permanent damage to the unit during the cannon level adjustment.*

To install and/or replace clips:

1. Remove Cannon Assembly from playfield.
2. Remove Post Assembly from plastic ring.
3. Insert clips.
4. Assemble Post Assembly to plastic ring.
5. Return Cannon Assembly to same position on playfield and make the necessary adjustments.

CANNON LEVEL ADJUSTMENT

1. Secure large leveling guide with vice grips (or comparable tool) while using an open-end wrench to loosen lock nut. Be careful not to let the entire locked screw/shaft assembly turn! This may result in permanent damage to the unit.
2. Once the lock nut is loose, use an allen-wrench to loosen leveling guide set screw.
3. Rotate leveling guide (clockwise to raise, counter-clockwise to lower) to align the top of the mechanism with the top of the playfield. Adjust the remaining two guides if necessary. To check adjustment, return playfield to the horizontal playing position.
4. Reverse step sequence to re-secure the assembly.

5010-09416-00	R21, R23, R25, R27, R29, R31, R33, R35	Resistor, 470 Ω , 1/4w, 5%
5010-09534-00	W3, W4	Resistor, 0 Ω
5010-10171-00	R13 - R20	Resistor, 56 Ω , 1/4w, 5%
5011-12956-00	R5 - R12	Resistor, 2.7K Ω , 1w, 5%
5040-08986-00	C1	Capacitor, 100M, 10v
5043-08980-00	B	Capacitor, .01 μ F, 50v
5040-09537-00	C2	Capacitor, 100 μ F, 100v
5070-09054-00	D1 - D24	Diode 1N4004
5162-12635-00	Q5-Q12	Transistor TIP102 NPN
5190-09016-00	Q13 - Q20	Transistor 2N4403 PNP
5191-12179-00	Q1-Q4	Transistor TIP36C PNP
5315-12009-00	U2	IC 74HCT374
5315-12031-00	U5	IC 74HCT244
5315-12812-00	U1	IC 74HCT138
5315-12951-00	U3	IC 74HCT00
5370-12272-00	U4, U6	IC LM339 QUAD COMP
5791-10862-09	J907	Connector, 9-pin Header Sq. Pin
5791-10862-05	J901, J904	Connector, 5-pin Header Sq. Pin
5791-10862-13	J902	Connector, 13-pin Header Sq. Pin
5791-12461-06	J905, J906	Connector, Str Sq. Pin Header .100
5791-12516-00	J903	34 HEN 2x17 STR
5100-09690-00	BR1	Bridge Rectifier
5731-10356-00	F901 - F904	Fuse S-B, 3A., 250v
5733-12060-01	-	Fuse Holder (F901-F904)

A-15472 Fliptronic II Board

A-14689 WPC Coin Door Interface Board

Part Number	Designator	Description
5070-09054-00	D1-D7	Diode, 1N4004, 1.0A.
5791-10862-18	J1	Connector, 18-pin Header Str Sq.
5791-10862-08	J2, J6	Connector, 8-pin Header Str Sq.
5791-10862-13	J3	Connector, 13-pin Header Str Sq.
* 5791-10862-15	J4	Connector, 15-pin Header Str Sq.
* 5791-10862-09	J5	Connector, 9-pin Header Str Sq.
* 5645-09025-00	SW1	Switch DIP 8-Position

Notes:

1. For Belgium, France, Finland, Sweden and England use A-14689-1 Coin Door Interface Board.
2. * = Used on Electronic Coin Door only.

A-15894 Flipper Opto Board

Part Number	Designator	Description
5010-08930-00	R1, R2	Resistor 470Ω, 1/2w, 5%
5490-12451-00	OPTO1, OPTO2	Opto Inter Lg. 10ma.
5791-12273-07	J1	Connector, 7-pin Header

C-13940 5-Switch & Diode Assembly

Part Number	Designator	Description
5070-09054-00	D1 - D5	Diode 1N4004, 1.0A.
5791-10862-07	J2	Connector, 7-pin Header Sq.
5791-12462-06	J1	Connector, 6-pin Header Sq.

A-14876-R-3 Fliptronic II Flipper Assembly (Lower Right)
A-14876-L-3 Fliptronic II Flipper Assembly (Lower Left)

Item	Part Number	Description
1.	A-14877-R	Flipper Base Assy, Right
	* A-14877-L	Flipper Base Assy, Left
2.	SW-1A-193	Switch Assembly
3.	4701-00002-00	Lockwasher, #6 Split
4.	4105-01019-10	Sh. Metal Screw, #5 x 5/8 P-RH-A
5.	4008-01079-05	Mach. Screw, 8-32 x 5/16 H-SOC

20.	4406-01117-00	Nut, 6-32 Hex.

Notes:

1. * Items for Left Flipper Assembly ONLY.
2. Each Flipper Assembly is mounted beneath the playfield, in conjunction with the Plastic Flipper & Shaft, (20-9250-6) and Flipper Rubber (23-6519-4) on the upper side of the playfield.
3. With the flipper, in the non-activated position, the E.O.S. Switch contacts must have a gap of .062 (±.015) inch. When flipper is activated switch must close.
4. Any adjustment of the E.O.S. Switch must be made at a minimum distance of 0.25 inch from the switch body.
5. Longer blade of E.O.S. Switch must be straight. Gap adjustment is done by adjusting shorter blade.
6. All moving elements of the assembly must operate freely without any evidence of binding.
7. Apply Loctite™ 242 when reattaching screws to the Flipper Stop Assy, the Solenoid Bracket, and the Flipper Bushing.

Associated Parts for Left & Right Flippers:

21.	23-6519-4	Flipper Rubber (Red)
22.	20-9250-6	Flipper & Shaft (Yellow)

Wiring Diagrams and Schematics

CONNECTOR & COMPONENT IDENTIFICATION

Each plug or jack receives a number that identifies the circuit board and position on that board that it connects to. J-designations refer to the male part of a connector. P-designations refer to the female part of a connector. For example, J101 designates jack 1 of board 1 (a Power Driver Board Board jack); P206 designates plug 6 of board 2 (a CPU Board plug). Identifying the specific pin number of a connector involves a hyphen, which separates the pin number from the plug or jack designation. For example, J101-3 refers to pin 3 of jack 1 on board 1.

Other game components may also have similar numbers to clarify their locations or related circuits. For example, F501 refers to a fuse located on the Sound Board.

Prefix numbers for the WPC circuit boards are listed below.

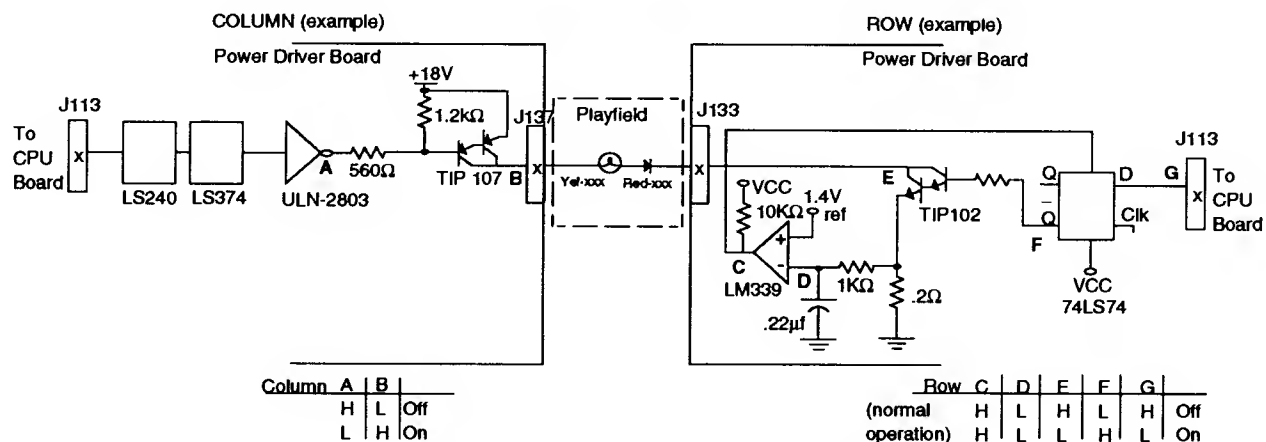

- 1-Power Driver Board
- 2-CPU Board
- 5-Sound Board
- 6-Dot Matrix Controller
- Dot Matrix Display/Driver Board
- 9-Fliptronic II Controller Board

Schematics for standard WPC backbox boards are found in the WPC Schematics Manual. Playfield, cabinet, and all other backbox board schematics are found in this section.

Flipper Switches

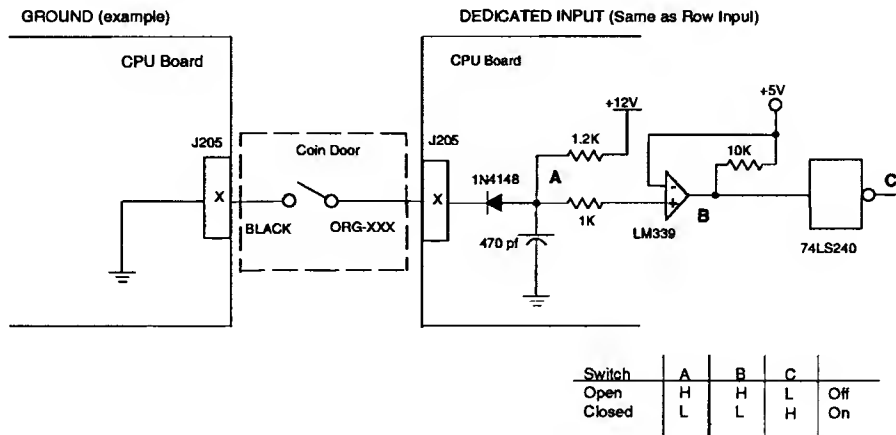

Switch Matrix Circuit

The microprocessor is constantly strobing the column side of the switch. When point "A" on the column circuit toggles low the column side is active.

When a switch closes the row side of the circuit activates. The "+" input to the LM339 drops below +5V causing its output to go low. Corresponding row and column switches must be low at the same time, for the switch to be considered closed by the microprocessor. When the switch opens, the "+" input to the LM339 is above +5V, its output is high and the row is inactive.

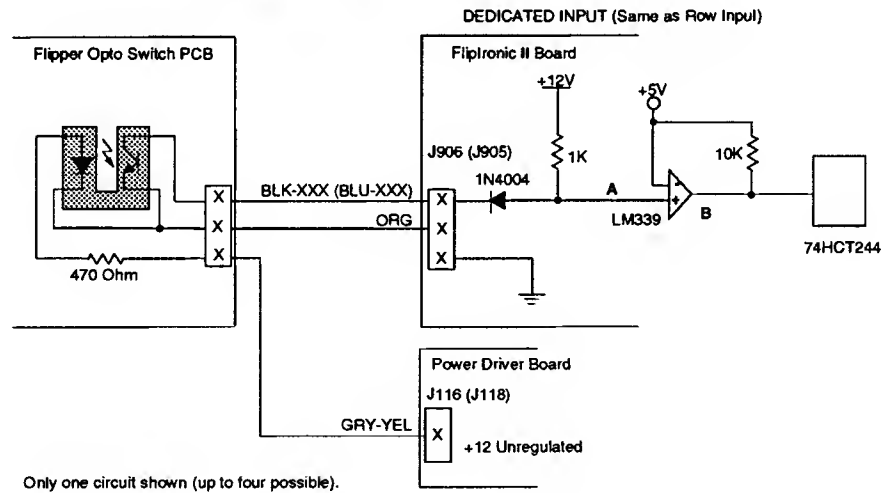

Dedicated Switch Circuit

The dedicated switches operate similar to switches in the matrix except that instead of a column circuit there is a direct tie to ground. Therefore, the column side is constantly active (low).

When a switch closes the row side of the circuit activates. The "+" input to the LM339 drops below +5V causing its output to go low. Since the row circuit is tied directly to ground through the switch, the switch is considered closed by the microprocessor. When the switch opens, the "+" input to the LM339 is above +5V, its output is high and the row is inactive.

Flipper Switch Circuit

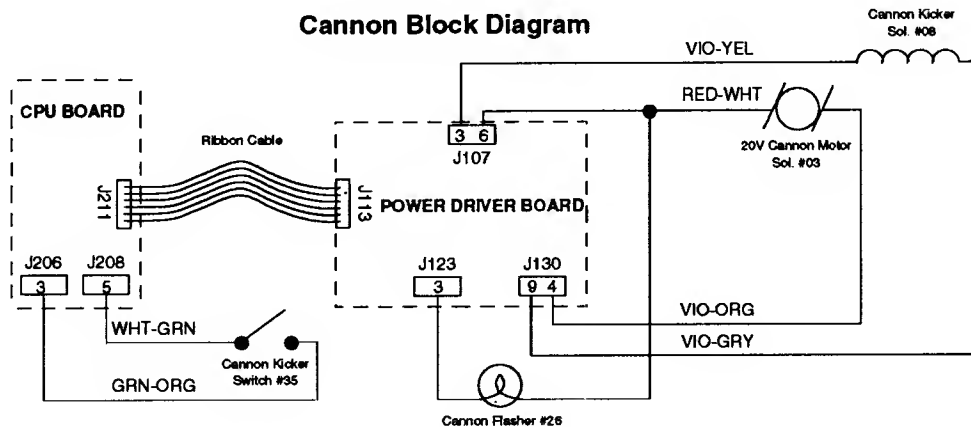

The flipper switch circuits operate similar to the dedicated switch circuit. The circuits are active low and tied to ground through the switch.

When a switch closes the row side of the circuit activates. The "+" input to the LM339 drops below +5V causing its output to go low. Since the row circuit is tied directly to ground through the switch, the switch is considered closed by the microprocessor. When the switch opens, the "+" input to the LM339 is above +5V, its output is high and the row is inactive.

Cannon Block Diagram

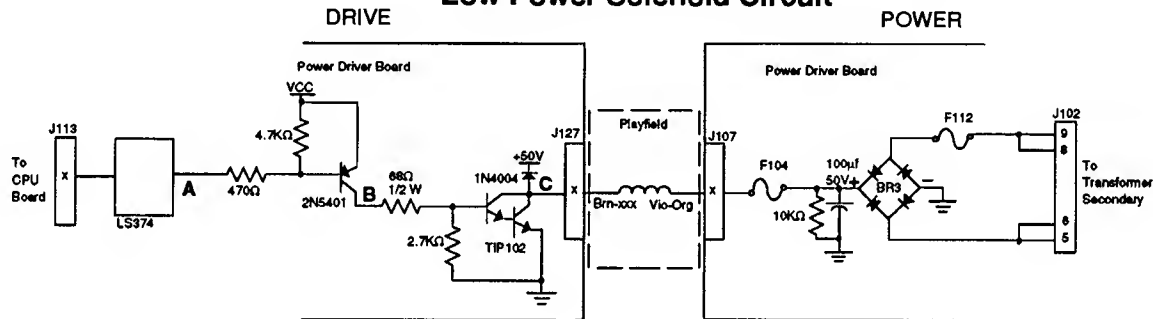

High Power Solenoid Circuit

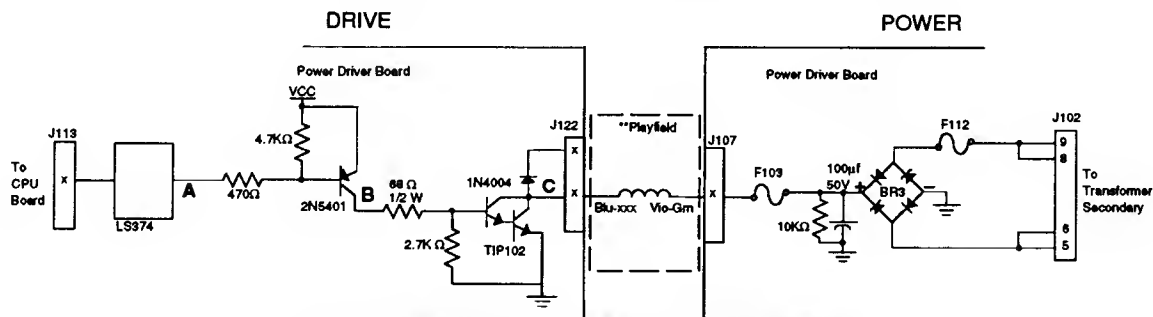

The microprocessor toggles the output of the 74LS374. When point "A" drops low, point "B" the collector of the 2N5401 transistor is high. A high at point "B" causes point "C" the collector of the TIP102 transistor, and point "D" the emitter of the TIP36 transistor to drop low. When point "D" is low the coil is grounded through the transistor and the coil turns On. The coil shuts Off when point "A" toggles high.

Low Power Solenoid Circuit

The microprocessor toggles the output of the 74LS374. When point "A" is low, point "B" the collector of the 2N5401 transistor is driven high. A high at point "B" turns On the TIP102 transistor and causes point "C" to drop low. When point "C" is low the coil is grounded through the transistor and the coil turns On. The coil shuts Off when point "A" toggles high.

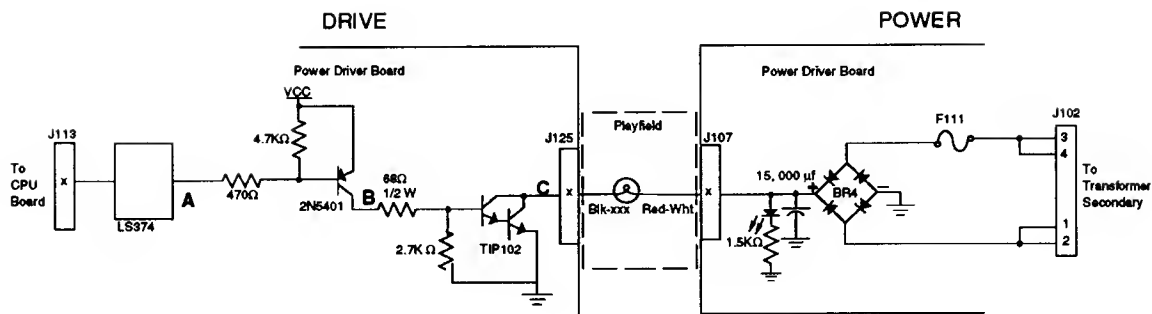

Special (General Purpose) Solenoid Circuit

* "Playfield Circuit When used for coil driver only (either +50V or +20V). If used for flashlamp driver see playfield circuit below. Tieback Diode is not used for flashlamp circuit.

The microprocessor toggles the output of the 74LS374. When point "A" drops low, point "B" is high. A high at point "B" causes a low at point "C". When point "C" is low the coil/flashlamp is grounded through the transistor and the coil/flashlamp turns On. When point "A" toggles high the coil/flashlamp turns Off.

Flashlamp Circuit

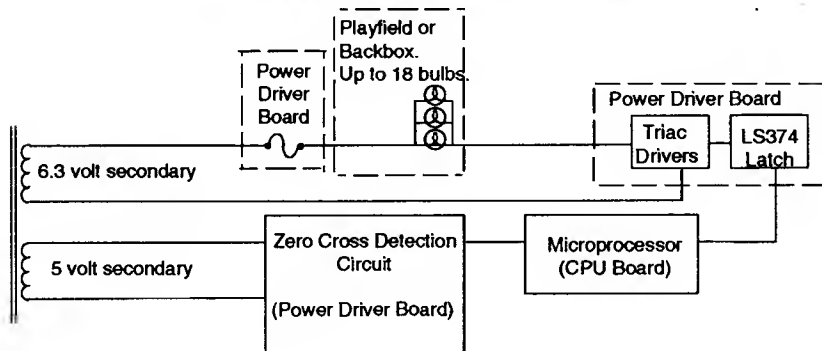

The Microprocessor toggles the output of the 74LS374. When point "A" is low, point "B" the collector of the 2N5401 transistor is high. Once point "B" is high, point "C" the collector of the TIP102 transistor is low. When Point "C" is low the flashlamp is grounded through the transistor and the flashlamp turns On. When point "A" toggles high the circuit shuts Off.

General Illumination Circuit

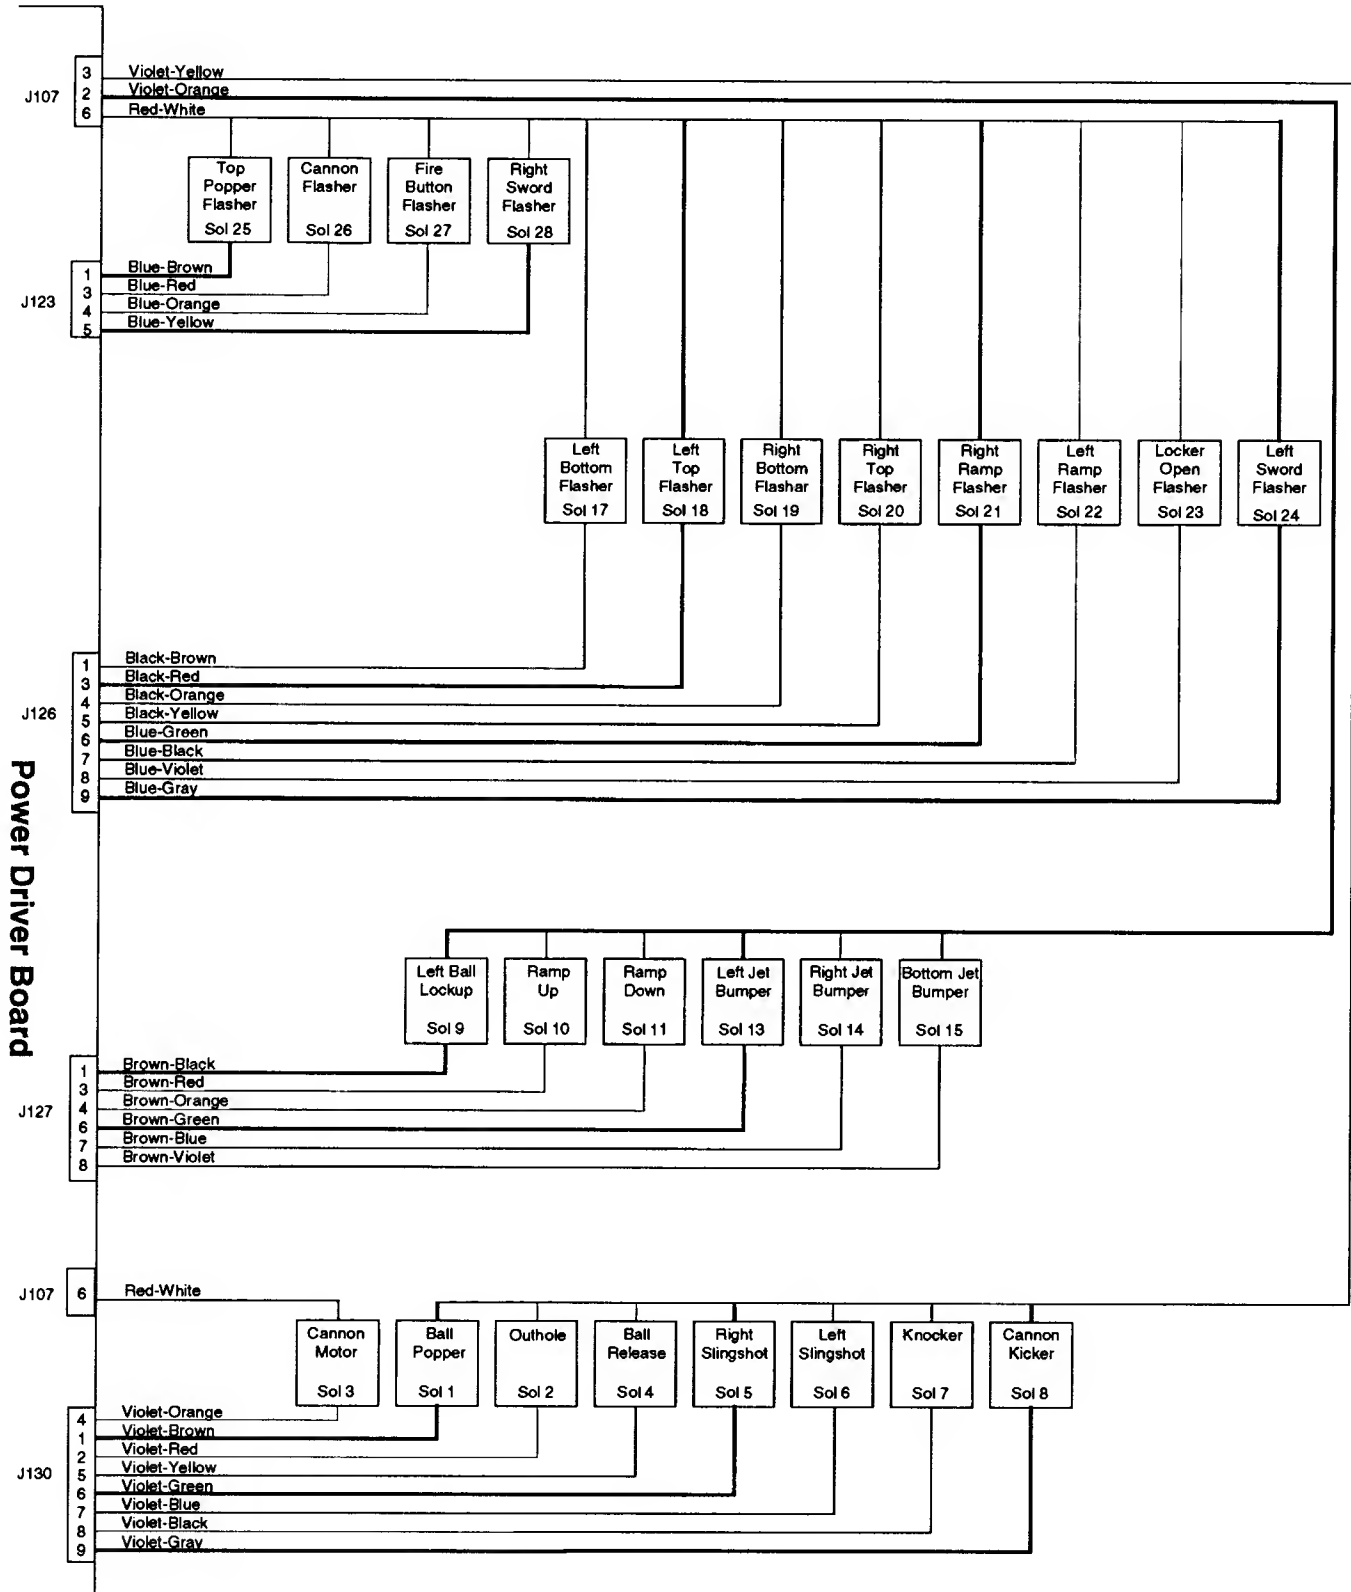

Block Diagram of General Illumination Circuit

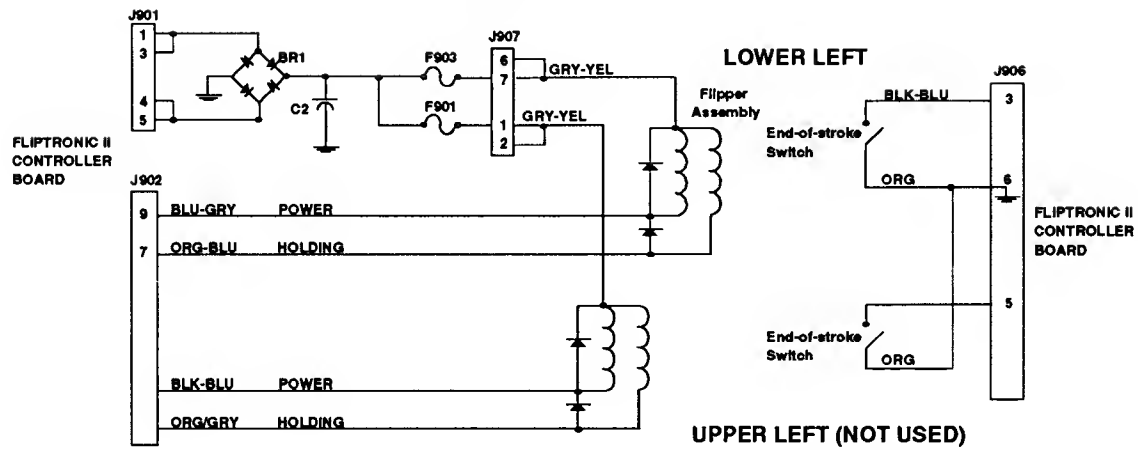

When point "A" toggles low, then points "B" and "C" are high. This turns On the triac and the desired General Illumination string lights.

PINBALL GAME ASSEMBLY INSTRUCTIONS

BLACK ROSE IS A 3 BALL GAME.

<u>Power:</u>	Foreign 230V @ 50 Hz Japan 100V @ 50Hz	<u>Dimensions:</u>	Width: 26" Approx. Depth: 55" Approx. Height: 77" Approx.
<u>Temp.:</u>	32° F to 100° F (0° C to 38° C)	<u>Weight:</u>	Approx. 297 lbs. (crated)
<u>Humidity:</u>	Not to exceed 95% relative.		

1. Open the shipping container; remove all cartons, parts, and other items, and set them aside.
2. Place the cabinet on a support and attach rear legs using leg bolts. Leg levelers and leg bolts are provided among the parts in the cash box.
3. Attach the front legs (after installing leg levelers), using leg bolts. See diagram below..

Pinball Assembly, Playfield Pitch Angle, and Leg Leveler Details.

4. Reach into the cabinet and backbox and ensure that the interconnecting cables are free to move (not kinked or pinched). Be careful to avoid damaging wires at any stage of the assembly process.
5. Raise the hinged backbox upright and latch it into position. Unlock the backbox, and remove the backglass, storing it carefully to avoid scratches. Remove the shipping block holding the Insert Board. Unlatch and open the Insert Board. This allows access to the bolt holes used for securing the backbox upright. Install the washer-head mounting bolts through the bottom holes of the backbox into the threaded fasteners in the cabinet to secure the backbox. Close the Insert Board and latch it in position. Reinstall the backglass, and lock the backbox.

CAUTION

FAILURE TO INSTALL the backbox mounting hardware properly can cause personal injury. **NEVER TRANSPORT** a pinball game with the hinged backbox erect. Always lower the backbox forward onto the playfield cabinet on a layer of protective material to prevent marring or damage and possible personal injury.

6. Extend each leg leveler slightly below the leg bottom, so that all four foot pads are extended about the same distance. Remove the cabinet from its support and place it on the floor.
7. Unlock and open the coin door. Locate the Molding Latch Lever, and move the lever toward the left side of the game, to release the front molding. Lift the front molding off the playfield cover glass, return the latch lever to the right, and close the coin door. Carefully slide the glass downward, until it clears the grooves of the left and right side moldings. Lift the glass up and away from the game, storing it carefully to avoid breakage.
8. Place a level or an inclinometer on the playfield surface. Adjust the leg levelers for proper playfield level (side-to-side). NOTE: It is recommended that these measurements be made ON the playfield, not the cabinet nor the playfield cover glass. Tighten the nut on each leg leveler shaft to maintain this setting.
9. The TRU-PITCH™ level is located on the right shooter rail. This allows the playfield pitch angle to be accurately adjusted WITHOUT REMOVING THE GLASS. The first line (closest to the front of game) on the level is approximately 6 degrees. Every line after that is approximately another 1/2 degree of pitch. The recommended pitch for Black Rose is between 6 and 6 1/2 degrees. The NOSE of the bubble is between the first and second line on the level (see diagram below).

TRU-PITCH™ level between 6 and 6 1/2 degrees.

CAUTION

Playfield pitch angle adjustments can affect the operation of the plumb bob tilt, inside the cabinet. The plumb bob weight is among the parts in the cash box; the operator should install the weight and adjust this tilt mechanism for proper operation, after completion of the desired playfield pitch angle setting.

10. Move the game into the desired location; recheck the level and pitch angle of the playfield.
11. Verify that the **required number** of balls are installed in the game. **BLACK ROSE** uses 3 balls.
12. Install playfield mylars if desired.

NOTE: The **Black Rose** playfield is specially coated with a Diamond Plate™ surface and does not require a protective mylar. However, playfield mylars can be purchased through your local Bally Distributor. Specify part number 03-7960-20013-1 for full playfield mylar.

13. Clean and reinstall the playfield cover glass, reversing the procedure of step 7.

14. To attach line cord, remove envelope stapled to the inside cabinet (near cashbox). Remove the four Phillips-head screws that mount the line cord cover plate to the rear cabinet. Match the prongs on the plug with the holes in the receptacle, and push line cord securely into place. Make sure cord is aligned with the indentation on cover plate (indentation should point toward bottom of cabinet). Remount line cord cover plate. If desired, four tamper resistant screws have been provided in an envelope marked "Security Screws" (located in cashbox) to remount cover plate.

U.9 Presets

Use the Up or Down buttons to cycle through the available Presets. When the desired Preset is displayed, press the Enter button to lock in that Preset. If a mistake is made, press the Escape button while "Saving Adjustment Value" is displayed. The new value is ignored and the original value is retained.

U.9 01 Install Extra Easy

The game play difficulty adjustments can be changed to a combination that is MUCH LESS to MUCH MORE difficult than Factory Settings. The Game Difficulty Setting Table lists the adjustments and settings that comprise the individual groups.

U.9 02 Install Easy

Somewhat LESS difficult than factory setting.

U.9 03 Install Medium

About the SAME as factory setting.

U.9 04 Install Hard

Somewhat MORE difficult than factory setting.

U.9 05 Install Extra Hard

MUCH MORE difficult than factory setting.

Standard Adjustments

A.1 14 Replay Award

For the form of award automatically provided when the player exceeds any replay level for either Auto% Replay, or Fixed Replay.

- Credit - Reaching each Replay level awards credit.
- Ticket - Reaching each Replay level awards a ticket.
- Ball - Reaching each Replay level awards an Extra Ball.
- Audit - Reaching each Replay level awards nothing to the player; it does increase the entry value of the Audit Item(s) maintaining a tally of these awards.

A.1 15 Special Award

The award automatically provided when the player scores a special.

- Credit - Scoring a Special awards a Credit.
- Ticket - Scoring a Special awards a Ticket.
- Ball - Scoring a Special awards an Extra Ball.
- Points - Scoring a Special awards 1 Million points.

A.1 16 Match Award

The award automatically provided when the players wins a match.

- Credit - Winning a Match awards a Credit.
- Ticket - Winning a Match awards a Ticket.

A.1 19 Match Feature

The desired percentage for the Match Feature occurring at the end of the game.

- OFF - Match Feature is not available.
- 1 -50% - 1% is 'hard'; 50% is 'extremely easy'. The Match Feature selects a random two-digit number at the end of the game and compares each players score for an identical two digits in the rightmost two positions. A matching of these two digits results in an award of a Credit or a Ticket.

A.1 21 Language

The language the game uses: English, French, or German.

A.2 Feature Adjustments

A.2 01 LOCK TIME-DOWN RATE

The rate at which a ball will be held in lockup during two ball multiball. Setting range is from 1 to 99 seconds.

Factory Default: 20 Seconds

A.2 02 RIGHT RAMP TIME-DOWN RATE

The rate at which the five lights in front of the right ramp time-down once lit. Setting range is from 1 to 99 seconds.

Factory Default: 20 Seconds

A.2 03 MIDDLE RAMP OPEN

The number of consecutive middle ramp loops that are needed to open the middle ramp. Setting range is from 1 to 10 loops.

Factory Default: 2 Loops

A.2 04 MIDDLE RAMP OPEN MAXIMUM COUNT

The highest number of consecutive middle ramp loops that are needed to open the middle ramp. Setting range is from 2 to 20 loops.

Factory Default: 6 Loops

A.2 05 COMBINATION SHOT 1 TIME-DOWN

The rate at which the first combination shot times down once lit (top left loop). Setting range is from 1 to 99 seconds.

Factory Default: 5 Seconds

A.2 06 COMBINATION SHOT 2 TIME-DOWN

The rate at which the second combination shot times down once lit (far right shot). Setting range is from 1 to 99 seconds.

Factory Default: 5 Seconds

A.2 07 CANNON RELOAD TIME-DOWN RATE

The rate at which the ramp stays open after the cannon is shot and missed allowing an instant reload. Setting range is from 1 to 99 seconds.

Factory Default: 20 Seconds

A.2 08 MIDDLE RAMP TIME-DOWN RATE

The rate at which the three lights in front of the middle ramp time-down once lit. Setting range is from 5 to 99 seconds.

Factory Default: 6 Seconds

A.2 09 EXTRA BALL RANDOM AWARD

The percentage of times the game will award or offer an extra ball when Rigging Swing, Walk the Plank, Knife Throw, or Polly is activated. Percentage is based on total number of extra balls collected, skill or random. Setting range is from 1 to 99 percent.

Factory Default: 25 Percent

A.2 10 JACKPOT LIT RANDOM AWARD

The percentage of times the game will award or offer Jackpot Lit when Rigging Swing, Walk the Plank, Knife Throw, or Polly is activated. Percentage is based on total number of Jackpot Lits collected, skill or random. Setting range is from 1 to 99 percent.

Factory Default: 15 Percent

A.2 11 RANDOM GAME AWARDS

The awards given or offered in the Rigging Swing, Walk the Plank, Knife Throw, and Polly. When Extra Ball or Jackpot Lit is not given by a random award, then the award given will be based on this adjustment.

- | | | |
|---------------|---|--|
| EASY | - | Valuable point/features will be awarded more often. |
| MEDIUM | - | Valuable point/features will be awarded evenly. |
| HARD | - | Valuable point/features will be awarded less often. |

Factory Default: MEDIUM

A.2 12 SKILL SHOT LEVEL

The difficulty of the plunger skill shot.

- | | | |
|---------------|---|---|
| EASY | - | Skill shot has only one level of difficulty. |
| MEDIUM | - | Skill shot has two levels of difficulty. |
| HARD | - | Skill shot has three levels of difficulty. |

Factory Default: EASY

A.2 14 HIDDEN TREASURE JEWEL RESET

The number of jewels needed for Hidden Treasure Mode to start.

Factory Default: 6 Jewels

A.2 15 MILLIONS MODE TIME-DOWN RATE

The amount of time Millions Mode will be active once collected. Setting range is from 5 to 99 seconds.

Factory Default: 30 Seconds

A.2 16 LOCK ENABLE DIFFICULTY

The way a lock can be enabled.

- | | | |
|-------------|---|--|
| EASY | - | Lock light lanes remain lit after MULTIBALL. |
| HARD | - | Lock lanes are cleared at the end of MULTIBALL. |

Factory Default: HARD

A.2 17 BROADSIDE BONUS LITE

How the center broadside bonus feature is lit.

- | | | |
|---------------|---|---|
| EASY | - | Broadside is lit (turned on) at the start of each ball. |
| MEDIUM | - | Broadside is carried over from ball to ball. |
| HARD | - | Broadside is turned off at the start of each ball. |

Factory Default: EASY

A.2 21 SPECIAL LIT AFTER 'X' NUMBER OF SHIPS

The number of ships that must be sunk before Special is lit. Setting range is from 1 to 9 ships sunk.

Factory Default: 2 SHIPS SUNK

A.2 28 DOUBLE BROADSIDE MODE TIME-DOWN RATE

The time that Double Broadside mode will be active once collected. Setting range is from 5 to 99 seconds.

Factory Default: 30 Seconds

A.2 29 BALL SAVER

The amount of time that the ball saver is active per ball. *NOTE:* Ball saver will return the ball to the shooter if the player has not had 'X' amount of play time that ball.

- | | | |
|-------------|---|--|
| 0 | - | Ball saver is turned off. |
| 1-30 | - | Number of ball play time seconds that the ball will be returned to the player is lost. |

Factory Default: 7 Seconds

A.2 31 MULTI-BALL MULTI BONUS RESET

Select whether or not Multi-ball 'MULTI BONUS' resets after each multi-ball, or is carried over from each multi-ball mode that game.

- | | | |
|-------------|---|---|
| EASY | - | MULTI BONUS carries over from multiball to multiball. |
| HARD | - | MULTI BONUS resets after each multiball. |

Factory Default: EASY

A.2 32 SINKSHIP LETTERS LITE AT GAME START

Select the number of letters in SINKSHIP are lit at the start of a game. The more letters lit the easier it is to sink a ship.

- | | | |
|-------------------|---|---------------------------------------|
| ALL OFF | - | No letters are lit at game start. |
| S-SINKSHIP | - | 1 to 8 letters are lit at game start. |

Factory Default: SINK letters lit.

A.3 Pricing Adjustments

A.3 01 Game Pricing (if set to custom, then 02 to 09 are available)

The cost of a game is selected from the Standard Pricing Table or by installing Custom pricing.

A.3 02 Left Coin Units

A.3 03 Center Coin Units

A.3 04 Right Coin Units

A.3 05 4th Slot Units

The number of coin units purchased by a coin passing through the left, center, right, and fourth coin chutes.

A.3 06 Units/Credits

Defines the number of coin units required to obtain 1 credit. A coin unit counter in the game program totals the number of coin units purchased through all coin chutes prior to each game. If the total number of these coin units exceeds or matches the Unit per Credit value by a multiple (or more, coin units) of the specified Units per Credit value the Credits display shows the proper number of credits. The coin unit counter retains any remaining coin units, until the start of Ball 2; then the coin unit counter is cleared (its contents are zeroed).

A.3 07 Units/Bonus

Additional credits are to be indicated in the credits display, when a certain number of coin units are accumulated.

A.3 08 Bonus Credits

The number of credits that are awarded when the Units/Bonus level is achieved.

A.3 09 Minimum Units

No credits are to be posted (indicated in the credit display), until the credits unit counter reaches a particular value, by setting this value to 02 (or more).

A.3 10 Coin Door Type (if set to custom, then 11 to 15 are available)

This adjustment is used to preset adjustments 11 through 15, based on standard coin doors (U.S.A., German, Etc.).

A.3 11 Collection Text

The coin system used to display the Earning Audits.

A.3 12 Left Slot Value

A.3 13 Center Slot Value

A.3 14 Right Slot Value

A.3 15 4th Slot Value

The monetary value of the left, center, right, and 4th coin chutes.

A.3 16 Maximum Credits

The maximum number of credits the game can accumulate, either through game play awards or coin purchases. The range of this setting is 5 through 10. Reaching the specified setting prevents the award of any credits.

A.3 17 Free Play

The player can operate the game without a coin (free play) or with a coin.

- | | | |
|-----|---|--------------------------------------|
| NO | - | A coin is necessary for game play. |
| YES | - | Game play is free; no coin required. |

A.3 18 Hide Coin Audits

The coin audits may, or may not be displayed.

- | | | |
|------------|---|---|
| YES | - | The coin audits are not displayed. |
| NO | - | The coin audits are displayed. |
| HIDE NAMES | - | The coin audit value is shown but not the audit name. |

A.3 19 1 Coin Buy-in

If game pricing is set to 1 for 50¢/2 for \$1.00 the player is allowed to 'buy-in' a subsequent game for 1 coin. The number of games that may be purchased at this cost is determined by the number of players in the previous game; that is, if the previous game had three players, 3 Credits can be purchased at the rate of 1 coin per credit.

- | | | |
|-----|---|---|
| YES | - | The player has 10 seconds to buy-in at 1 coin per game. |
| NO | - | The buy-in feature is disabled. |

A.3 20 Base Coin Size

The number of ticket per coin calculations.

A.3 21 Coin Meter Units

It is possible to connect a coin meter to the knocker coil driver which will log all coins through all slots. This adjustment activates the use of the knocker driver for this purpose, and determines the value of each unit on the meter. For example, to show the total amount of money collected as "total quarters", set this adjustment to "0.25". To show the amount of money collected as "total dollars", set this adjustment to "1.00".

Setting this adjustment to anything other than Off establishes the coin unit for a meter attached to the knocker driver, and overrides use of the knocker during awards.

A.4 H.S.T.D. Adjustments

A.4 01 Highest Scores

The game maintains a record of the four highest scores achieved to date.

- OFF - No high scores are recorded, or displayed.
- ON - The four highest scores are stored in memory and displayed in the Attract Mode.

A.4 02 H.S.T.D. Award

The award given for achieving the High Score To Date, or the Champion H.S.T.D: Credit or Ticket.

A.4 03 Champion H.S.T.D.

The "Highest" High Score is displayed in the Attract Mode. This score is not cleared when "High Score Reset Every" occurs.

- ON - The "Highest" High Score is retained in memory and is displayed.
- OFF - The "Highest" High Score is not retained.

A.4 04 Champion Credits

The operator chooses the number of credits or tickets awarded for a Grand Champion Score. Range: 00 - 10.

A.4 05 H.S.T.D. 1 Credits

A.4 06 H.S.T.D. 2 Credits

A.4 07 H.S.T.D. 3 Credits

A.4 08 H.S.T.D. 4 Credits

The number of credits or tickets to be awarded whenever a player exceeds the 1st, 2nd, 3rd, and 4th highest scores. Range: 00 - 10.

A.4 09 High Score Reset Every

The number of games to be played before an automatic reset of the displayed "Highest Score" occurs. The values provided upon reset are those selected by the operator in the Back-up High Scores. Range: OFF (disabled); 250 to 20,000.

A.4 10 Backup Champion

The Back-up Grand Champion Score. Range: 00 - 99,900,000.

A.4 11 Backup H.S.T.D. 1

A.4 12 Backup H.S.T.D. 2

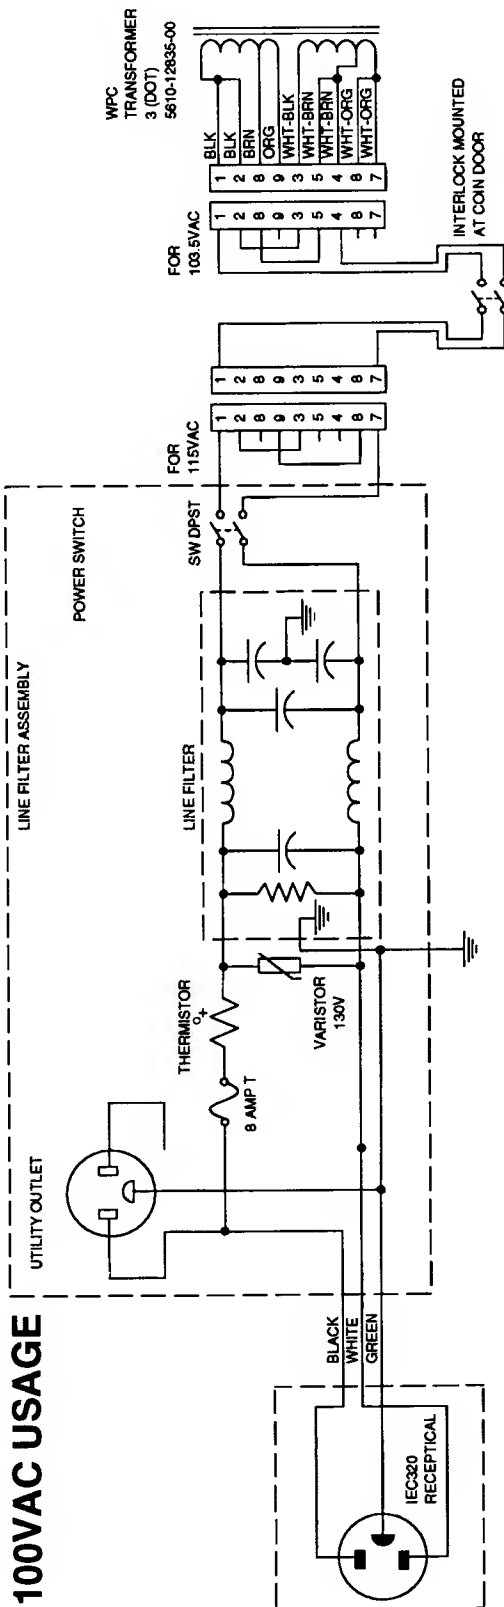

A.4 13 Backup H.S.T.D. 3

A.4 14 Backup H.S.T.D. 4

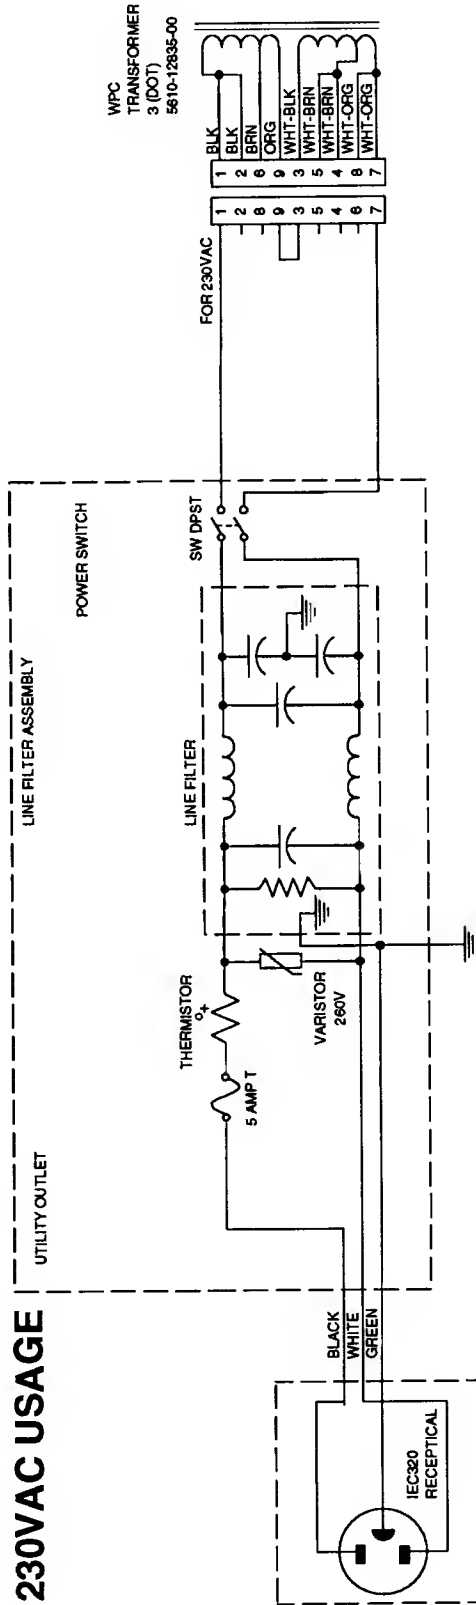

The first through the fourth Back-up High Score values. The game automatically restores this value when the High Score Reset Every value is reached. Range: 00 - 99,900,000.

WARNINGS & NOTICES

WARNING

FOR SAFETY AND RELIABILITY, substitute parts and equipment modifications are not recommended. Use of Non-BALLY parts or modifications of game circuitry, may adversely affect game play, or may cause injuries.

SUBSTITUTE PART OR EQUIPMENT MODIFICATIONS may void FCC Type Acceptance.

BECAUSE THIS GAME IS PROTECTED by Federal copyright, trademark, and patent laws, unauthorized game conversions may be illegal under Federal law.

THIS 'CONVERSION' PRINCIPLE ALSO APPLIES to unauthorized facsimiles of BALLY equipment, logos, designs, publications, assemblies and games (or game feature not deemed to be public domain), whether manufactured with BALLY components or not.

WARNING

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generated, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

RF Interference Notice

CABLE HARNESS PLACEMENTS and ground strap routing on this game have been designed to keep RF radiation and conduction within levels accepted by the FCC Rules.

TO MAINTAIN THESE LEVELS, reposition harnesses and reconnect ground straps to their original placements, if they become disconnected during maintenance.

FCC STICKER. Check the back of your game to verify that an FCC-certification sticker was attached to your game at the factory. All Games that leave the BALLY plant have been tested and found to comply with FCC Rules. Because the sticker is proof of this fact, legal repercussions to the owner and distributor may result, if the sticker is missing. If you receive a game, manufactured after December 1982, that has no FCC sticker, call BALLY for advice or write us a note on your Game Registration Card. Be sure that the card bears your game's serial number.
